THE LORD OF THE RINGS

DR. 1

////// FIND-IT-IN-FRONT: Dr. Pinball Section Explained ////

The key technical data from various parts of the manual were extracted and combined into the "Find-It-In-Front: Dr. Pinball Section." This section (pages DR. ① - ⑩) will assist the technician in locating important technical information needed to troubleshoot the Pinball Machine. **Dr. Pinball** is also available in a Flow Chart Help Format in the Game Display. To access, enter the **Portals™ Service Menu**.

////// How It Works ////

First, the operator / technician must enter the **Service Menu Mode** (for a complete description of the **Portals™ Service Menu and ICONS Read! Section 3, Chapter 1**). To get into the **Service Menu Mode**, power-up the game (if not already) and open the **Coin Door**. On the **Coin Door** is the **Portals™ Service Switch Set** (Red, Green & Black Buttons).

Step 1: Push down the **Black "BEGIN TEST" Button**. Looking at the Video Display you will momentarily see the introductory screen followed by the **MAIN MENU**.

Step 2: Move through the Menus by pushing the **Red "LEFT"** or **Green "RIGHT"** Buttons.

Step 3: Select or activate the *Icons* by pushing the **Black "ENTER"** Button.

While in the **Portals™ Service Menu**, the **Start Button** can be used in lieu of the **Black Button**; the **Left & Right Flipper Buttons** can be used in lieu of the **Red & Green Buttons**. However, in **Switch or Active Switch Tests** *only* the **Red & Green Buttons** can be used.

In our **Portals™ Service Menu**, selecting the "DR." *Icon* will bring the operator/technician into **DR. PINBALL** (Flow Chart Menus), the "on-screen" diagnostic aide. This is a feature that will allow you to utilize the power of the micro-processor assisting in troubleshooting a problem with the machine in a **Flow Chart** format (follow the questions & answer by using the *Mini-Icons* in the display).

After entering **Portals™**, the **MAIN MENU** now appears with the "DIAG" *Icon* (GO TO DIAGNOSTICS MENU) flashing; press the **Black "ENTER"** Button to activate this **ICON**. The **DIAGNOSTICS MENU** now appears with the "SW" *Icon* (GO TO SWITCH MENU) flashing; use the **Red "LEFT"** or **Green "RIGHT"** Buttons, until the "DR." *Icon* (DR. PINBALL) is flashing:

Press the **Black "ENTER"** Button to activate this **ICON**. The **DR. PINBALL MENU** (Flow Chart Menus) now appears with the **COIL "DR." Icon** flashing. Three (3) *Icons*, Coil "DR.", Switch "DR." and Lamp "DR." are available for selection. Selecting a particular *Icon* will give you a choice of which specific **Coil** (any and all coil assemblies such as *Flippers, VUKs, Magnets, etc.*), **Switch** or **Lamp Circuit** needs to be diagnosed. After selection, **Dr. Pinball** will now display a question or a procedure to follow such as "Does the lamp turn on?" or "Check bridge rectifier BR-20, if short replace." When **Dr. Pinball** displays a question or requests a procedure, **Dr. Pinball** will expect a response such as "NO" or "YES". You the operator/technician must respond by using the **Red** or **Green Buttons** to "SELECT" a *Mini-Icon* and the **Black Button** to "ACTIVATE or ENTER" your selection.

For *Mini-Icons* explanations & details, see the end of **Section 3, Chapter 2, GO TO DIAGNOSTICS MENU, Dr. Pinball**.

DIAGNOSTIC AIDS

OPEN THE DOOR

at VBATT Test Point on the CPU/Sound Bd. (more details in Section 5, Chapter 4, PCBs).

If this **display flashes**, the game is indicating that **CMOS RAM** memory (CPU Loc. U212) has been corrupted. This is caused by either failure in memory (e.g. batteries are dead and/or faulty RAM) or upon installation of updated version of game code. Opening the **Coin Door** will initiate a **Factory Restore (Reset)**, by opening the **Memory Protect Switch**. Check battery voltage

OPERATOR ALERT! #2 AUTO LAUNCH COIL MALFUNCTION

switch associated with a coil (e.g. #16 Shooter Lane & #2 Auto Launch) is stuck closed (caused by a switch jam or stuck ball); the CPU/Sound Board will activate the coil approximately ten times and if the switch remains closed, the game will report this switch in **Technician Alerts** & will indicate the following display warning:

This **display** is shown momentarily during **Game Mode** or **Power-Up** to alert the operator of a coil malfunction (coil doesn't energize or coil fires a multiple number of times). **OPERATOR ALERT!** works by monitoring any switch activated coil that has the potential to trap a ball when disabled (e.g. in the Auto Launch, Scoop, Eject, etc.). This alert can also appear if a

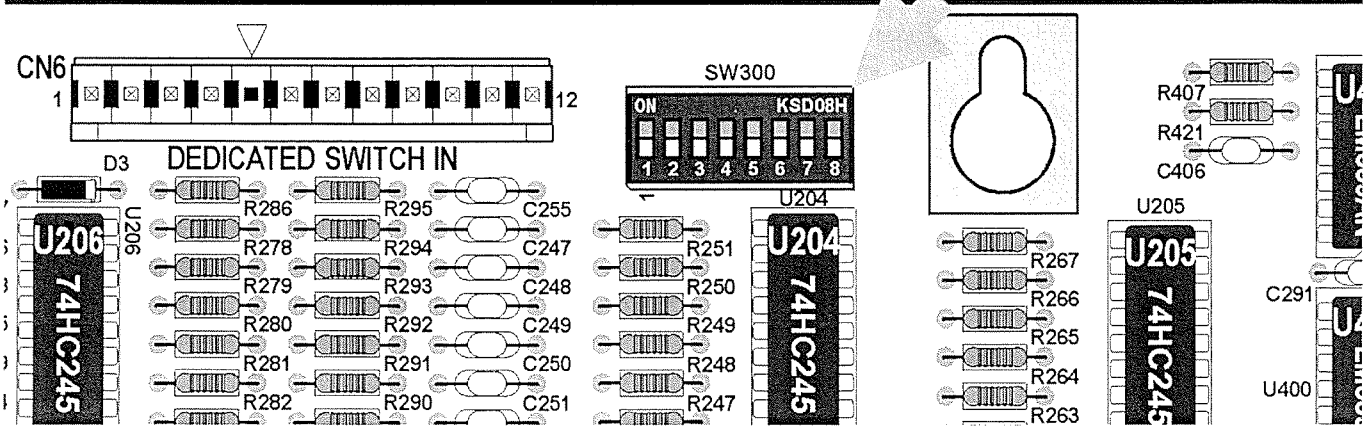

PLEASE CHECK TECH REPORT PORTALS->DIAG->TECH

(review Section 3, Chp. 4, GO TO ADJUSTMENTS MENU, Standard Adjustments, Page 44).

If this **Tech Report Alert flashes** (along with an audible sound), the game has detected faulty switches and/or missing pinballs. Select the "TECH" Icon for information (review **Technician Alerts, Pages 24-25**). For this **Alert display** to appear, Standard Adj. 49, must be changed to **POWERUP, COIN DOOR** or **POWERUP AND COIN DOOR**, the default is **NEVER**

POWER REQUIREMENTS

! This game *must be connected to a properly grounded outlet to reduce shock hazard* & insure proper game operation. See *Sec. 5, Schematics & Troubleshooting, Chp. 3, Cabinet Wiring (Transformer Power Wiring)*, for transformer connections required for **Normal, High, and Low Line** conditions. **!**

Normal Line:		110v AC - 125v AC @ 60Hz	
Domestic use an 8AMP 250v Slo-Blo Fuse.	AVG OPERATION	MAX OPERATION	
	CURRENT: 2.8AMP WATTAGE: 329w	CURRENT: 8AMP WATTAGE: 940w	
High Line:		218v AC - 240v AC @ 50Hz	
Export use 2x 5AMP 250v Slo-Blo Fuses. (*England & Hong Kong use an 8AMP 250v S/B Fuse.)	AVG OPERATION	MAX OPERATION	
	CURRENT: 1.8AMP WATTAGE: 412w	CURRENT: 5AMP 8AMP* WATTAGE: 1145w 1832w*	England & Hong Kong use an 8A Fuse.
Low Line:		95v AC - 108v AC @ 50Hz / 60Hz	
Export Japan Only use an 8AMP 250v Slo-Blo Fuse.	AVG OPERATION	MAX OPERATION	
	CURRENT: 2.6AMP WATTAGE: 264w	CURRENT: 8AMP WATTAGE: 812w	

TRANSPORTATION GAME DIMENSIONS

BEFORE TRANSPORTING

To reduce the possibility of damage, observe **ALL** precautions whenever transporting the game.

Read & follow *Section 1, Chapter 1, Pinball Game Set-Up Procedures, and How to Secure the Backbox for Transporting*. Remove the legs and secure the game within the transporting vehicle.

SAVE AND RETAIN ALL PRINTED INFORMATION INSIDE THE CABINET !

Shipping Box Dimensions

Height 56" Width 31"
Depth 31"
Approx. Unboxed Weight: 270lbs. (+/- 10)
Boxed Weight:
Wt. 290lbs. (+/- 5)

CAUTION

At least 2 people are required to move and maneuver this game. Use proper moving equipment & extreme care while handling!

The overall **Front / Back Height** dimensions include the **added 3/4"** with the **Leg Levelers** turned all the way **in**.

The Cabinet is *designed* to give the recommended **6.5° pitch to the Playfield** when all four (4) **Legs** are installed with the **Leg Levelers** turned all the way **in**.

With the **Leg Levelers** turned all the way **out** (not recommended), an additional **1 3/4"** should be added to the respective **Back or Front Height** dimensions.

Pinball Game Set-Up Procedures

...after reading the Pinball Game Set-Up Instruction Sheet (SPI Part N° 755-5310-00) included with your New Pinball Game, continue with the below procedures:

With the Back Glass Removed:

1. Check all connectors in the Backbox for loose wire terminations. Reseat any loose wire by pushing in on the terminal. Push on all connectors plugged into the CPU/Sound Board, I/O Power Driver Board, and the Display Power Bd. to check that they are properly seated. Ensure Fluorescent Light Tube is seated correctly. Check that all fuses are seated properly. Close and lock the Backbox and secure its' keys back inside the Coin Door.

With the Playfield Glass Removed:

2. Make sure the proper amount of pinballs were installed (Amount of balls are always specified on decal attached to the lock down assembly and at the top of the inside cover).

3. Remove all shipping tie downs, shipping blocks, packing foam, shipping instruction pages, etc. (if any) from the game. READ ALL PRINTED INFORMATION! Shipping instructions, labels and/or decals describe warnings, cautions, and/or important information specific to the game. **SAVE ALL PRINTED INFORMATION.**

4. Raise the playfield and support it, by lifting the Prop Rod (located on the left, inside the cabinet). The end of the Prop Rod should be placed into the hole under playfield. See the illustration "Easy Access Service System - 3 Positions" on Page 4.

5. Visually inspect all cabinet cables and connector terminations; ensure no wires or cables are pinched and that cable harnesses are not pulled tight.

6. Lower the playfield and ensure game is level side-to-side by adjusting Leg Levelers, if required. See the illustration "Leg Leveler Adjustment" on Page 4. Start with the Leg Levelers turned all the way in (1.25" from floor to bottom of leg), depending on the condition of the floor, adjust the Leg Levelers as required until the game pitch is 6.5°, determined by the Bubble Level.

USE THE BUBBLE LEVEL ON THE WOOD RAIL (LOWER RIGHT) TO DETERMINE IF LEVEL IS ACHIEVED. BUBBLE SHOULD APPEAR BETWEEN THE 2 BLACK LINES. SEE PAGE 4 FOR AN ILLUSTRATION.

The playfield incline affects difficulty of play. Use the recommended incline; Game difficulty is best varied using game adjustments.

With the Coin Door Open:

- If desired, perform any self tests at this time (see Section 3, Chapter 1, Portals™ Service Menu Introduction, and Chapter 2, GO TO DIAGNOSTICS MENU, for instructions on how to enter "Begin Play Test" and "Game Name Test" Menus to test components on the game).
- If desired, adjust Game Pricing, Standard and/or Custom (see Section 3, Chapter 4, GO TO ADJUSTMENTS MENU and Section 3, Chapter 5, GO TO INSTALLS MENU to adjust Game Difficulty, 3- or 5-Ball Play, Home or Tournament Settings, Novelty, Add-A-Ball, etc.).

PINBALL GAME SET-UP

CAUTION: At least 2 people are required to move and maneuver game. Use proper moving equipment & extreme care while handling. Pinball game is 260lbs (w/ 10). Refer to Game Manual for further Game Set-Up Procedures (Sec. 1, 2 & 3) and other important information.

TOOLS REQUIRED: 1/8" Socket Wrench & Utility Knife

1 Before opening box, lay the Decal flat on its side with "TRUCK THIS SIDE ONLY" facing the floor.

2 Slide game out using the Black Nylon Strapping as a brace.

3 Remove the Four (4) Identical Legs with Levelers from the cabinet and set aside. (SAVE! all packing materials and information sheets related to this pinball and Set-Up is complete.)

4 At this point DO NOT CUT STRAPPING. (You want to keep the Backbox secured in the down position.) Loosen and remove the 4 Leg Bolts (use 1/8" Socket Wrench) and set aside.

5 Lift game into an UPRIGHT POSITION (Coin Door Facing Up).

6 Install FRONT LEGS using the bolts removed from Step 4. Secure tightly. Take care not to scratch the Black. Finish on any of the Legs.

7 Carefully let the game down on the FRONT LEGS. Care should be taken. Game is heavy! Two (2) people are recommended for this and the following step.

8 Using supports or two (2) people, grip the rear of the cabinet up and install REAR LEGS. Secure tightly.

9 Cut BLACK NYLON STRAPPING. CAUTION: Strapping will SNAP, protect your eyes! Use extreme care when using a utility knife or scissors.

10 Lift the Backbox into the UPRIGHT POSITION. (Ensure the cables do not get pinched).

11 After the BACKBOX is in the UPRIGHT POSITION, locate the SPIN™ HEX KEY. While oriented, rotate KEY with a 3/4" turn until latched to the socket.

12 The next step you will restore the PLAYFIELD GLASS to BACK GLASS to access the inside of the cabinet & Backbox.

13 Open the Coin Door and pull the YELLOW HANDLE to the LEFT and at the same time put up on the FRONT TOP MOLDING and remove. The GLASS can now be pulled out towards you and removed. TAKE CARE while making self-test on a table surface.

14 Through the open Coin Door, remove the RETURN RING at the rear of the CASH BOX and open. Remove the PINBALLS & the PLUMB BOB from the SPARE PARTS BAG. (Use the clear spare parts bag) INSTALL the PINBALLS by placing them on the playfield so they can not roll into the Outdoor Ball Through.

15 Install the PLUMB BOB on the Hanger Wire & tighten the Thumb Screw. Loosening the Thumb Screw & lowering or raising the PLUMB BOB makes the Games Tilt Function more or less sensitive.

Remove the PINBALL GAME MANUAL (optional) Use the art and the equipment. (See Section 1 Chapter 1, which describes how to lift the playfield to access the Pinball Door for Adjustment. The manual gives you all the important information you need to know to fine-tune and other important information from the Pinball Diagnostic, Technical and more...

ALWAYS STORE THE MANUAL & INFORMATION SHEETS INSIDE THE CABINET WHEN NOT USING.

NOTE: KEYS are tied to the Backbox that if removed it locks the Backbox glass up. To restore the Backbox Glass to BACK GLASS to access the inside of the cabinet & Backbox, use the clear red cap used to unlock the Back Glass in the Coin Door.

STEAR
DIAGNOSTIC
1-800-645-0377
SPI Part N° 755-5310-00

er CE: "The appliance has to be placed in a horizontal position." "This appliance is not to be cleaned by a Water Jet."

After Set-Up

Pinball Game Set-Up Future Reference

Sec. 1: After Set-Up

CAUTION: At least 2 people are required to move and maneuver game.

Use proper moving equipment & extreme care while handling. Pinball game is 260lbs (+/- 10).

Refer to Game Manual for further Game Set-Up Procedures (Sec. 1, Chp. 1) and other important information!

TOOLS REQUIRED: 5/8" Socket Wrench & Utility Knife

1. Before opening box, lay the box flat on its side with "TRUCK THIS SIDE ONLY" facing the floor.

2. Slide game out using the Black Nylon Strapping as a handle.

3. Remove the Four (4) Identical Legs with Levelers from the carton and set aside. (SAVE! all packing materials and information sheets related to this pinball until Set-Up is complete.)

4. At this point **DO NOT CUT STRAPPING** (You want to keep the Backbox secured in the down position). Loosen and remove the 8 Leg Bolts (use 5/8" Socket Wrench) and set aside.

5. Lift game into an **UPRIGHT POSITION** (Coin Door Facing Up).

6. Install **FRONT LEGS** using the bolts removed from Step 4. Secure tightly. Take care not to scratch the Black Finish on any of the Legs.

7. Carefully set the game down on the **FRONT LEGS**. Care should be taken... Game is heavy, two (2) people are recommended for this and the following step.

8. Using supports or two (2) people, prop the rear of the cabinet up and install **REAR LEGS**. Secure tightly.

9. Cut **BLACK NYLON STRAPPING**. **CAUTION:** Strapping will **SNAP**, protect your eyes! Use extreme care when using a utility knife or scissors.

Pinball Game Set-Up Future Reference Continued

10. Lift the Backbox into the UPRIGHT POSITION (Ensure the cables do not get pinched).

11. After the BACKBOX is in the UPRIGHT POSITION, locate the 5/16" HEX KEY. While inserted, rotate KEY with a 3/4 turn until latched & locked.

12. The next step you will remove the PLAYFIELD GLASS & BACK GLASS to access the inside of the cabinet & Backbox.

NOTE: KEYS are tied to the Shooter Rod* (if equipped) or taped to the Playfield Glass (if equipped with Auto Plunger Button). Remove keys. One (1) set of keys opens the Coin Door, the other set is used to unlock the Back Glass to gain access to the White Star Board System.

13. Open the Coin Door and pull the YELLOW HANDLE to the LEFT and at the same time pull up on the FRONT TOP MOLDING and remove. The GLASS can now be pulled out towards you and removed. TAKE CARE while moving; set glass on a safe surface.

14. Through the open Coin Door, remove the RETAINING RING at the rear of the CASH BOX and open. Remove the PINBALLS & the PLUMB BOB from the SPARE PARTS BAG. (Save the other spare parts in cabinet). Install the PINBALLS by placing them on the playfield so they can roll into the Outhole Ball Trough.

15. Install the PLUMB BOB on the Hanger Wire & tighten the Thumb Screw. Loosening the Thumb Screw & lowering or raising the PLUMB BOB makes the Games Tilt Function more or less sensitive.

Remove the PINBALL GAME MANUAL (stapled to side of the left wall of the cabinet). Review Section 1, Chapter 1, which describes how to lift the playfield to access the Plumb Bob Tilt Assembly. The manual gives you all the important information you need to prepare for final set-up and other important information (such as Parts, Diagnostics, Schematics and more...).

ALWAYS STORE THE MANUAL & INFORMATION SHEETS INSIDE THE CABINET WHEN NOT USING.

How to Secure the Backbox for Transporting

For more Backbox details & part numbers, see Section 4, Chapter 1, Backbox Assembly, Pages 60-61.

Sec. 1: After Set-Up

Leg Leveler Adjustment

Attach the four (4) Leg Assemblies to cabinet corners with the eight (8) leg bolts provided.

Start adjustment with the leg levelers *turned all the way in*.

View the *bubble* in the level provided on the right side wood rail.

Adjust the front or rear levelers as necessary to cause the bubble to float between the two (2) black lines.

Use a pinball to roll down the center of the playfield for side-to-side leveling.

YOUR PLAYFIELD PITCH IS NOW AT 6.5° AS REQUIRED FOR PROPER GAME PLAY!

Note: For custom adjustment greater than >6.5° can be achieved by turning out the rear leg leveler(s), however, it is not recommended.

Easy Access Service System - 3 Positions

With the front molding & glass removed, carefully lift the playfield (*take care when using the Bottom Arch to hoist*).

Positions 1 & 2

When lifted high enough, the **Playfield Support Slide Brackets** (Fig. 1A) can be seen & can clear the cabinet front. At this time, pull the playfield toward the front of the cabinet, checking that the mechanical components clear the cabinet front, then rest the playfield on the **Playfield Support Slide Brackets** at the front channel of cabinet (Fig. 1C); Or, the **Prop Rod** (located on the right inside of cabinet) can be used by positioning the **Prop Rod** end into the receiving playfield hole (Fig. 1B).

Position 3

With the playfield at rest, hold the sides & pull toward the front of the cabinet (approx. 6" to 8"), until resistance is felt from **Edge Slide Brackets** stopping against the **Slide & Pivot Support Brackets** located on either side of the cabinet (Fig. 2A). At this time, swivel the playfield toward the Backbox, then rest on the top edge (Fig. 2B & 2C).

Game Operation & Features

Start of Game Features

Starting a Normal Game

Insert coin(s). The game generates a sound for the first coin & for each subsequent coin with the display indicating the number of credits posted. Press the **Start Button** and a start-up sound is produced, and the posted credits are reduced by one. Subsequent players can be added (**up to 4 can play!**) by pressing the **Start Button** before the end of ball 1 (*with sufficient credit in the game*).

The display now indicates the player or # of players selected from the total depressions of the **Start Button**. The display indicates the ball in play, and a ball is served to the *Shooter Lane*. An introduction is shown followed by Skill Shot Graphics and/or instructions. Pressing the **Start Button** after ball 1 of any player will start a new game (*if credits are available*), **but only** if the **Start Button** is depressed for 2-3 seconds. This delay is to avoid accidental "re-starts" of a game. **Note:** *Any partial credit remaining during game play after the end of ball 1, or power down, will be eliminated.*

Starting Team Play (Doubles!)

This option is adjustable with **Standard Adj. 50, Team Scores** (Default = **NO**). If **Standard Adj. 50, Team Scores** is changed to **YES**, then Team Play will be made available. **Team Play only works in a 4-Player Game**. The totals for Players 1/3 (Team 1) & Players 2/4 (Team 2) are then displayed individually **as well as** the combined score for **BOTH TEAMS**.

Starting Tournament Play with **TOPS**

This Pinball Game is **ToPS™ (Tournament Pinball System) Ready**. **Optional Tournament equipment & hardware (sold separately) is required**. Review **Section 3, Chp. 7, GO TO TOURNAMENT MENU**, for more info!

Unlike a "Normal Game", the Tournament Game is started by depressing the **Tournament Start Button** (*located on the Front Molding, if installed*). If adequate credit(s) are posted **and a Tournament is started** via **Portals™** (*select the "TOUR" icon in the Main Menu*), the **Tournament Start Button** will flash. *Any adjustments or installs changed will not be in affect. Starting a Tournament Game defaults to preprogrammed Tournament Rules (e.g. No Extra Balls, Specials or Bonus Credits are awarded); however, starting a Normal Game after a Tournament Game will then revert back to any unique adjustments or installs performed previously. During and End of Game Features operate in the same manner (differences in adjustment defaults are present).*

During Game Features

Feature Mode & Combination Shots

Features are lit on the playfield and started by completing *certain shots (e.g. completion of Target Banks, Orbit(s), Ramp(s) and/or any combination of the shots)*.

Multiball

Multiball is started after completion of certain features (*amount of balls used depends on game rules*).

Replay Feature

Replay awards are given as the player exceeds a High Score Level during game play. This can be adjusted with **Standard Adj. 3, Replay Award** (Default = **CREDIT**). Players exceeding the High Score Levels can receive: **CREDIT, EXTRA BALL, or SPECIAL**. Adjust to **NONE** if a replay award is not desired.

End of Game Features

Game Endings

When all player(s) have played all balls (including any Extra Balls), the game ends. If power is interrupted during the course of a game, it will end that game (**see Starting a Normal Game**). Closure of the Plumb Bob Tilt Switch according to the number of tilts set, **Standard Adj. 15, Tilt Warnings** (Default = **01**) or prolonged closure, will end the current Ball-In-Play. Closure of the Slam Tilt Switch on the Coin Door ends the current game(s).

Match Feature

At the end of each ball, earned bonuses are collected. At the end of the last ball of a game (including any extra balls, if applicable), earned bonuses are collected, then the system produces a random 2-digit number (a multiple of 10; 00 to 90). Matching the last 2 digits of the player's score with this number awards a credit. In **Std. Adj. 13, Match Percentage** (Default = **8%**) can be changed from 0-10%. Changing the percentage to **0% displays** the "Match Animation" at the end of the game, however, will never match nor award anything. Changing this adjustment to **OFF** will **not display** the "Match Animation" nor award anything.

Entering Initials/Name

If player achieved a new *High Score* in a game or achieved a *Special Feature (if given)* the player may enter 3 Initials. In **Std. Adj. 29, High Score Initials** (Default = **3 Initials**) can also be changed to **10-Letter Name**. Use the **Flipper Buttons** to choose a letter or character as seen on the Dot Display. Hitting the **Start Button** locks in the letter or character and proceeds to the next letter. The game then proceeds into the **Game-Over Mode** and then to the **Attract Mode**.

Note: **Standard Adj. 31, Custom Message** (Default = **ON**) can be displayed during the **Attract Mode**; enter letters in the same fashion.

For more details on Adjustments, see **Sec. 3, Chp. 4**.

Continued Next Page.

Auto Percentaging

This game is equipped with Auto Percentaging, **Standard Adj. 01, Replay Type** (Default = **AUTO**, adjustable). The *Replay Percent* is automatically adjusted, **Standard Adj. 02, Replay Percentage**, or you can set a *Fixed Replay Score*. Four levels may be selected. Adjustments allow awarding of a "CREDIT" (or your setting) as each level is exceeded. This can be adjusted with, **Standard Adj. 03, Replay Award** (Default = **CREDIT**). With the **Autopercentage Feature**, if the actual replay percentage is higher or lower than that desired, the game will automatically adjust for the new recommended percentage score(s). You may choose to make a different "score-to-beat" adjustment; this is done by utilizing **Standard Adj. 04, Replay Levels**. For more details with **Adjustments**, see **Section 3, Chapter 4, GO TO ADJUSTMENTS MENU**; also, see **Section 3, Chapter 5, GO TO INSTALLS MENU** for further customization of your Pinball Game.

Sec. 2: Game Op.

Instruction Card

Below is a **COPY** of the Game Instruction Card (SPI N^o: 755-5180-00 USA) which is included with every game. If your card is lost or damaged, simply **COPY** this page and *cut out* the Instruction Card as a *temporary replacement* until a *new card* is ordered.

(Hint: **COPY & CUT** along the dotted line and fold in the center to keep the "COPY" sturdy.)

Service Switch Set (Red, Green & Black Buttons) Access & Use

The *Service Switch Set* provides access for **three (3) functions** available for your use. They are **Volume Menu, Service Credits Menu** and **Portals™ Service Menu**. All are accessed separately depending on which colored button (**Red, Green or Black**) is **pushed first**.

If Coil & Flashlamp Testing, the Playfield Power Interlock Switch must be pulled out.

The Memory Protect Switch is disabled when the Coin Door is open (required for any changes...)

To access any of these **three (3) functions** you must first open the **Coin Door** (see pictorial above) with the Game in the **Attract Mode** (not already in any Function or Menu stated below).

Sec. 3: ...Menu Info.

Function 1, Volume Menu

Pushing the **Red "VOLUME" Button** first, enters the **Volume Menu**. While in this Mode, to **DECREASE** the volume, hold down or depress the **Red "LEFT" Button** until desired the volume is achieved; to **INCREASE** the volume, hold down or depress the **Green "RIGHT" Button** until the desired volume is achieved.

Note: Pushing the **Left or Right Flipper Buttons** operates the same as the **Red or Green Buttons** of the Service Switch Set, while in this Volume Mode.

Set between **0-31**; Once your adjustments are made, this menu will **automatically exit** a few seconds after the last button depression.

Function 2, Service Credits Menu

Pushing the **Green "SERVICE CREDITS" Button** first, adds **Service Credits** (will not affect your audits as "paid" credits). This is useful for the technician to test games in regular play without affecting the game audits. Each depression adds **1 credit**; up to **50 credits** can be applied. **Std. Adj. 16, Credit Limit**, determines this, however, it can be changed from **04-50**; for details see **Chapter 4** of this Section 3. Once your credits are added, this menu will **automatically exit** a few seconds after the last button depression.

Note: This function is disabled if **Standard Adjustment 30, Free Play**, is set to **YES**. The Service Credits are limited to the Credit Limit in addition to any paid credits present in the game (e.g. If the Credit Limit is 30, and there are 8 paid credits present, only 22 Service Credits can be applied.).

Function 3, Portals™ Service Menu

Pushing the **Black "BEGIN TEST" Button** first, enters the **Portals™ Service Menu**. Once in, navigate through all menus depressing the **Red "LEFT" or Green "RIGHT" Buttons**.

Note: Pushing the **Left or Right Flipper Buttons** operates the same as the **Red or Green Buttons** of the Service Switch Set, while in this Service Mode.

Select or activate the **Icon** chosen (the Icon will be "flashing") by pushing down or depressing the **Black "ENTER" Button**.

Note: Pushing the **Start Button** operates the same as the **Black Button** of the Service Switch Set, while in this Service Mode.

Please read the remainder of this Chapter for more information on the **Portals™ Service Menu**. The remaining six (6) Chapters of this Section explains all **Icons & Menus** in detail. **Read! Read! Read!**

Portals™ Service Menu Introduction

Portals™ Service Menu Introduction

Important: The *Dual Switch Bracket* holds the *Playfield Power Interlock & Memory Protect Switches*. It is located just inside the Coin Door frame (see pictorial of the *Coin Door* on the previous page). The Button Switch at the top is the *Playfield Power Interlock Switch*. It must be pulled out for electro-mechanical device testing or diagnostic purposes (this is required). If this button is pushed in, the *Playfield Power* is disabled while the *Coin Door* is **OPEN**. The Button Switch at the bottom is the *Memory Protect Switch*. It is enabled while the *Coin Door* is **CLOSED**; meaning any adjustment changes that are made **will not be written to memory**. If changing adjustments is required, ensure the *Coin Door* is **OPEN** to disable this switch, thus allowing for desired changes.

How to Use This Section

This section will cover all functions available in the *Portals™ Service Menu* in a *Step-By-Step* process. This section is divided into chapters which coincide with the **MAIN MENU**. The previous and following pages in this Chapter will instruct the operator on how to move through the Menus. It's simple, easy and fun to use!

To get into the *Service Menu Mode* review "**Function 3, Portals™ Service Menu**" on the previous page. After Power-Up, push down the **Black "BEGIN TEST" Button** to begin. Looking at the display you will momentarily see "**Service Menu**" with a satellite flying from right to left pulling a banner "**Portals©™**" followed by the **MAIN MENU**:

Use the **Red "LEFT" & Green "RIGHT" Buttons** (or **Left & Right Flipper Buttons**) to move the selected *Icon* left or right, and the **Black "ENTER" Button** (or **Start Button**) to activate the selected *Icon*. The use of the *Service Switch Set* (**Red, Green, & Black Buttons**) *is required* in *Switch Test* or *Active Switch Test*, as the **Start & Flipper Buttons** are a part of this test.

The **MAIN MENU** now appears with the "**DIAG**" *Icon* (**GO TO DIAGNOSTICS MENU**) flashing:

As the operator views the Menu Screen(s), the **MORE MORE** symbols indicates that there are more *Icons* to select in each direction. The *Icon* selected will blink. Pushing the **Black "ENTER" Button** (or **Start Button**) will select the *Icon* and the Menu Screen will change to the menu selected. Select the "**PREV**" *Icons* to move backwards through the menu levels. Select the "**QUIT**" *Icon* to completely exit the Service Mode.

View the *Portals™ Service Menu Icon Tree* on the next pages for a complete overview of all menus used in this system. The "**HELP**" *Icon* & "**?**" *Mini-Icon* provide explanation of **ICON** usage in the Menu where the "**HELP**" *Icon* or "**?**" *Mini-Icon* was selected. View **QUIT THIS SESSION (Exiting the Portals™ Service Menu)** at the end of this chapter (reference *Section 3, Chapter 1, Portals™ Service Menu Introduction*).

The **chapters** in this **section**, which coincide with the **MAIN MENU**, will also provide more detailed information. **Use both the manual and the display to help customize, troubleshoot and/or diagnose faults, if any.**

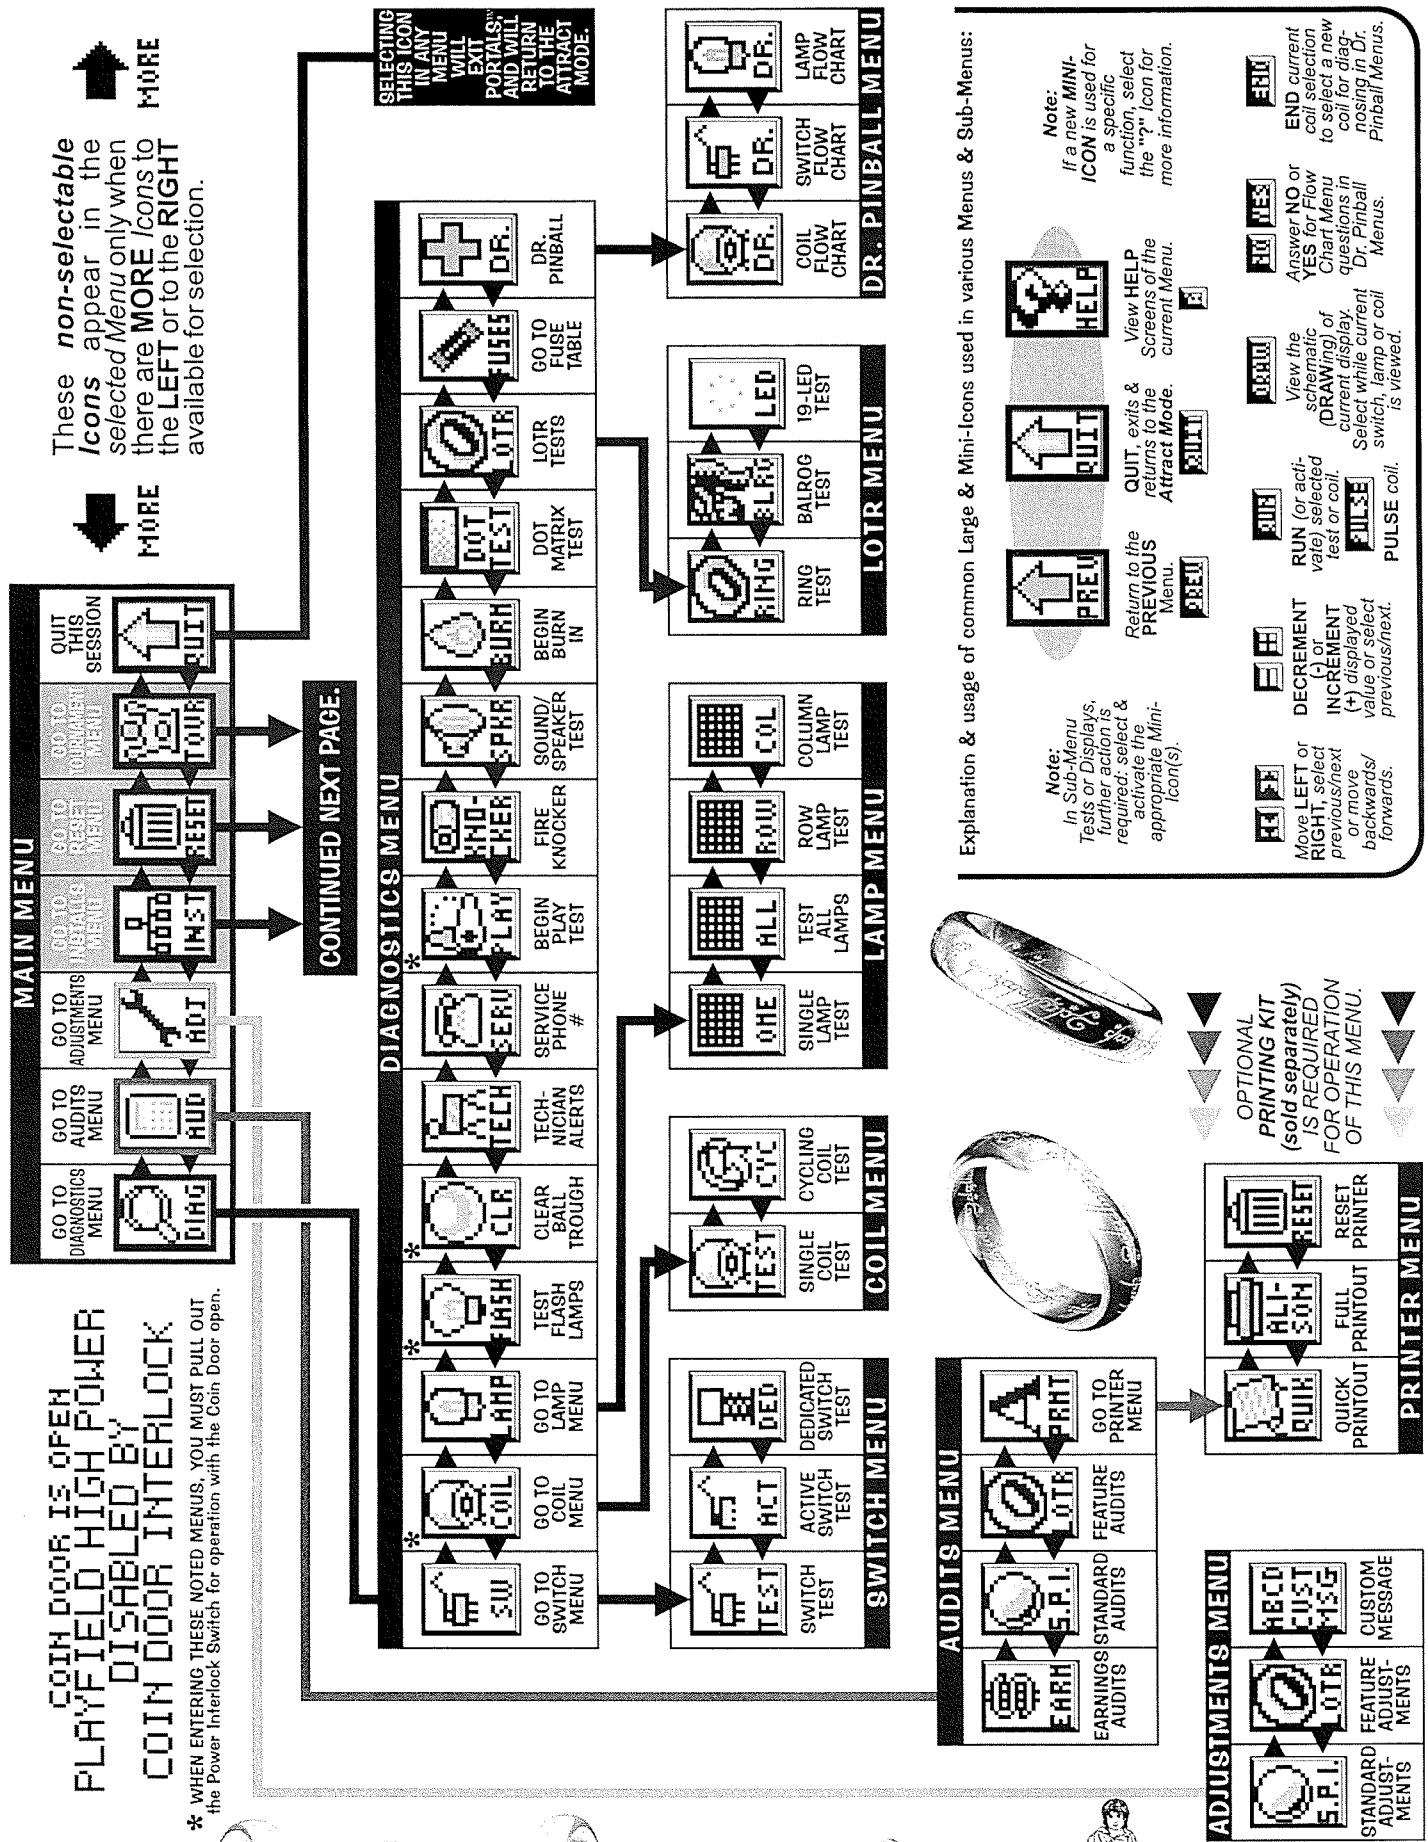

THE LORD OF THE RINGS Portals™ Service Menu Icon Tree

COIN DOOR IS OPEN
PLAYFIELD HIGH POWER
DISABLED BY
COIN DOOR INTERLOCK

* WHEN ENTERING THESE NOTED MENUS, YOU MUST PULL OUT the Power Interlock Switch for operation with the Coin Door open.

These non-selectable icons appear in the selected Menu only when there are MORE icons to the LEFT or to the RIGHT available for selection.

SELECTING THIS ICON IN ANY MENU WILL EXIT PORTALS™ AND WILL RETURN TO THE ATTRACT MODE.

Explanation & usage of common Large & Mini-Icons used in various Menus & Sub-Menus:

Note: In Sub-Menu Tests or Displays, further action is required; select & activate the appropriate Mini-Icon(s).

- PREV**: Return to the PREVIOUS Menu.
- QUIT**: QUIT, exits & returns to the current Menu.
- HELP**: View HELP Screens of the current Menu.
- END**: END current coil selection to select a new coil for diagnosing in Dr. Pinball Menu.
- YES**: Answer NO or YES for Flow Chart Menu questions in Dr. Pinball Menu.
- DRWD**: View the schematic (DRAWING) of current display. Select while current switch, lamp or coil is viewed.
- QUIT**: RUN (or activate) selected test or coil.
- FULSE**: PULSE coil.
- DECR**: DECREMENT (-) or INCREMENT (+) displayed value or select previous/next.
- LEFT**: Move LEFT or RIGHT, select previous/next or move backwards/forwards.
- PREV**: Return to the PREVIOUS Menu.
- QUIT**: QUIT, exits & returns to the current Menu.
- HELP**: View HELP Screens of the current Menu.
- END**: END current coil selection to select a new coil for diagnosing in Dr. Pinball Menu.

Note: If a new MINI-ICON is used for a specific function, select the "?" icon for more information.

OPTIONAL PRINTING KIT (sold separately) IS REQUIRED FOR OPERATION OF THIS MENU.

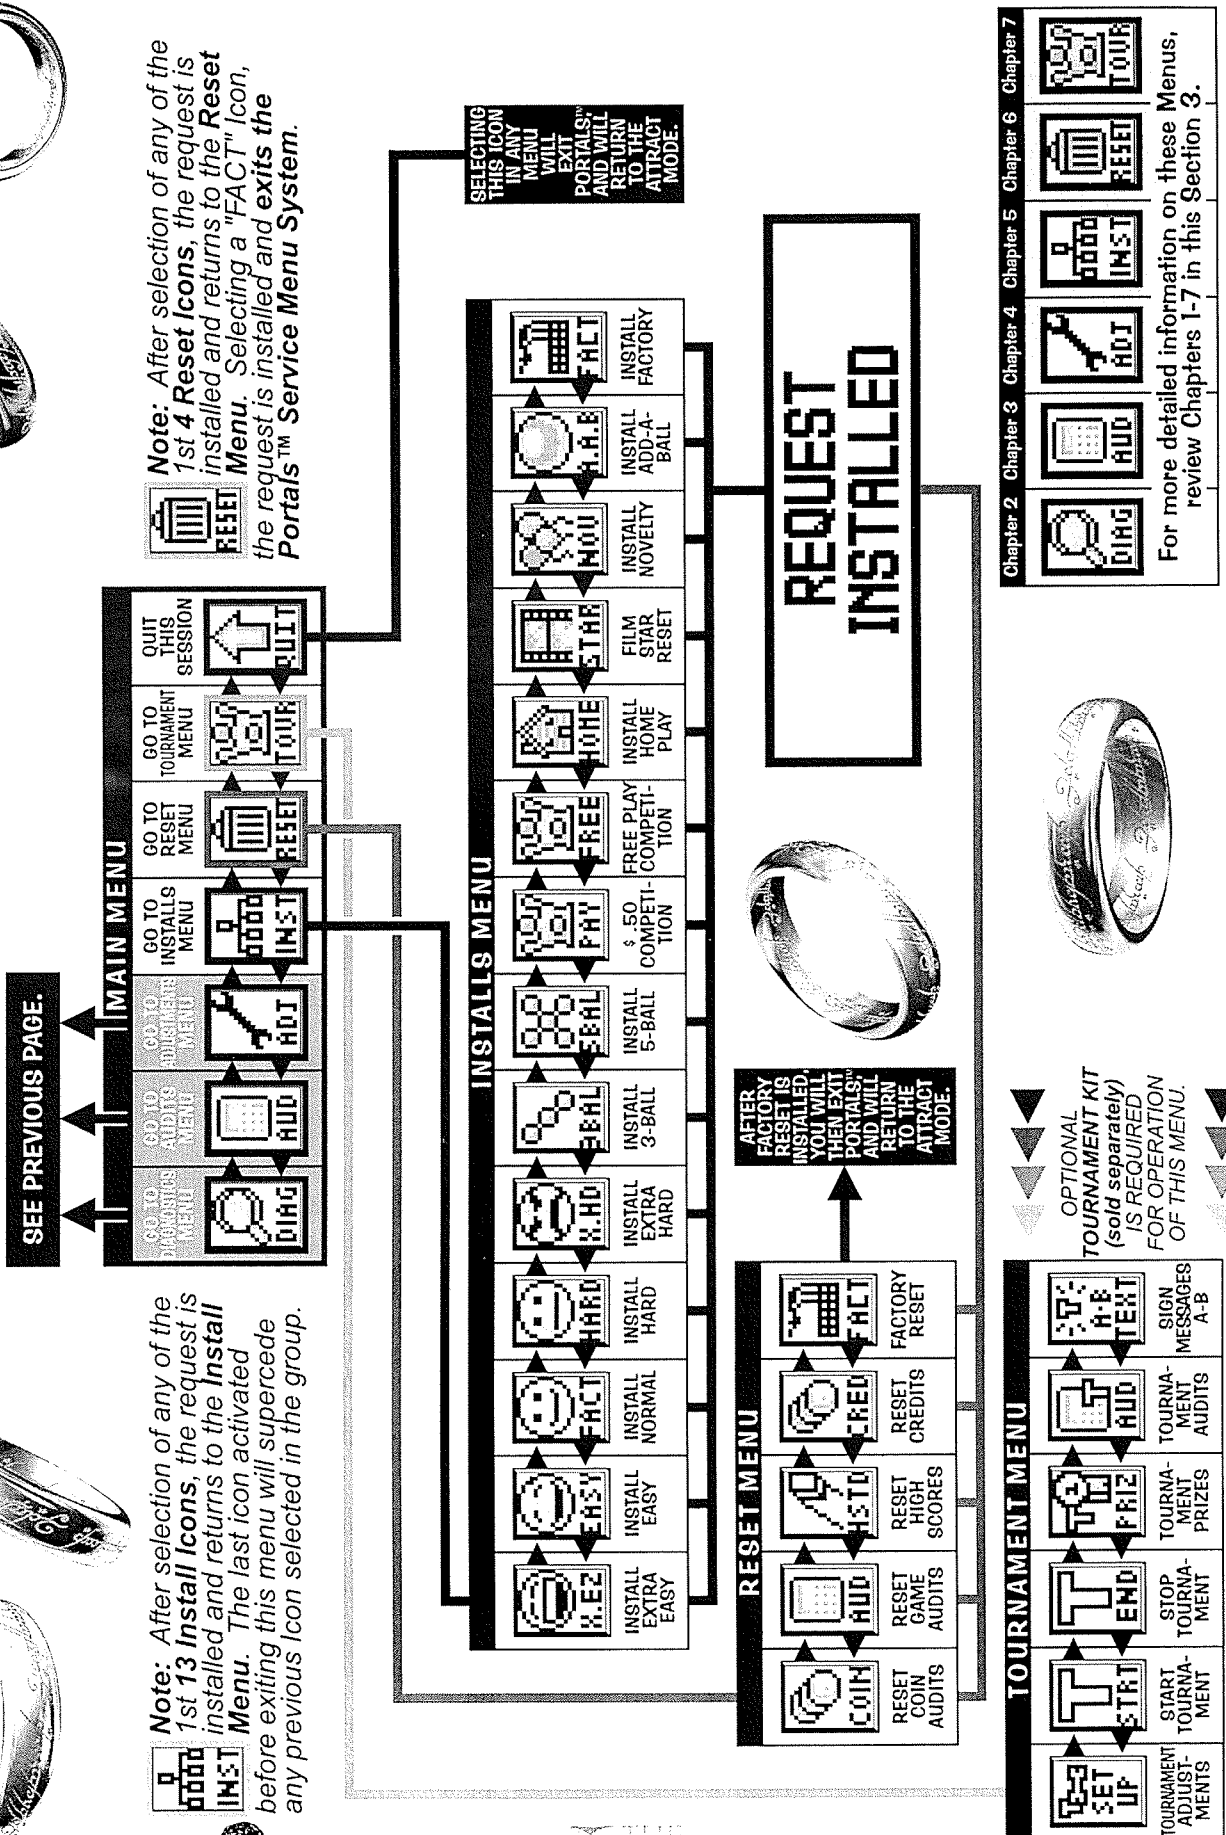

THE LORD OF THE RINGS Portals™ Service Menu Icon Tree Continued

Portals™ Service Menu Introduction

Note: After selection of any of the 1st 13 **Install Icons**, the request is installed and returns to the **Install Menu**. The last icon activated before exiting this menu will supersede any previous icon selected in the group.

Note: After selection of any of the 1st 4 **Reset Icons**, the request is installed and returns to the **Reset Menu**. Selecting a "FACT" icon, the request is installed and exits the **Portals™ Service Menu System**.

Portals™ Service Menu Example

This example will demonstrate activation of *Icons* in the **DIAGNOSTICS MENU**. The example will show activation of the "SW" *Icon* (**GO TO SWITCH MENU**). In this menu, the switches can be tested individually and also all active switches can be tested. Use the same technique to access all the *Icons* in the **Portals™ Service Menu**. Follow **Portals™ Service Menu Icon Tree** on the previous pages as a guide to help navigate through the entire system (Also, go to the chapter in this manual explaining the icon(s) selected.).

If the display is in any other menu other than the **MAIN MENU**, use the **Red "LEFT" & Green "RIGHT" Buttons** to select the "PREV" *Icon* and press the **Black "ENTER" Button** to *activate* the **ICON** thus moving back to the previous menu. Do so until **MAIN MENU** appears.

Chapters 2 through 7 will cover all menu items within the **Portals™ Service Menu**. The *Icon* is shown preceding the text. Find the *Icon* in the **Portals™ Service Menu** by navigating with the **Red or Green Buttons**. Each chapter started is from the **MAIN MENU**. Within the chapter, and Sub-Menu will be covered sequentially with their explanation & function. If the operator "*gets lost*", select and *activate* the "PREV" *Icon* until the display indicates **MAIN MENU**. For more help on Button Usage, select & *activate* the "HELP" *Icon* or "?" *Mini-Icons*.

EXPLANATION & USAGE OF COMMON LARGE & MINI-ICONS USED IN VARIOUS MENUS & SUB-MENUS:

These non-selectable *Icons* appear in the selected *Menu* only when there are **MORE** *Icons* to the **LEFT** or to the **RIGHT** available for selection.

Select and *activate* to return to the **PREVIOUS** *Menu*.

Select and *activate* to **QUIT**, exits & returns to the **Attract Mode**.

Select and *activate* to view **HELP** Screens of the current *Menu*.*

Select and *activate* to:

Move **LEFT** or **RIGHT**, select previous / next or move backwards / forwards.

DECREMENT (-) or **INCREMENT (+)** displayed value or select previous / next.

RUN (or *activate*) selected test or coil **PULSE** coil.

DRAW View the schematic (**DRAWING**) of current display. Select while current switch, lamp or coil is viewed.

* *Help Note*: An explanation of each *Mini-Icon* at that *menu level* will cycle continuously. To exit a display where no *Mini-Icons* are available for selection, pressing any button will exit the display.

Sec. 3: ...Menu Intro.

Example:

After entering **Portals™**, the **MAIN MENU** now appears with the "DIAG" *Icon* (**GO TO DIAGNOSTICS MENU**) flashing:

Press the **Black "ENTER" Button** to *activate* this **ICON**. The **DIAGNOSTICS MENU** now appears with the "SW" *Icon* (**GO TO SWITCH MENU**) flashing:

Press the **Black Button** to *activate* this **ICON**. The **SWITCH TEST MENU** now appears with the "TEST" *Icon* (**SWITCH TEST**) flashing:

Press the **Black "ENTER" Button** to *activate* this icon. The **Switch Test Display** now appears.

All switches can be tested one at a time. When possible, use a pinball to close any playfield switches; rolling the ball at Stand-Up Targets or over/under switches is suggested. Use finger for all non-playfield switches. As each switch is closed, the respective Switch Matrix Grid Position (1-64) will be lit.

To view the schematic for the switch selected, press either the **Red** or **Green Button** to select the "DRAW" *Mini-Icon*. Press the **Black Button** to *activate* this *Mini-Icon*; do so while the switch is momentarily closed. This will bring up the **Switch Schematic Display**. The display describes the switch in the Switch Matrix which includes the name of the switch, the Return (Row) Wire and the Drive (Column) Wire, drive transistor, and the "Pin-Outs" from the CPU/Sound Board. *Activating* the "DRAW" *Icon* when a switch is not closed, will give the generic switch schematic as shown below.

To *exit any display where there are no Mini-Icons* (Schematics or Help Displays), *press any button* to return to the previous Menu.

While in **Switch Test** or **Active Switch Test**, the **Flipper & Start Buttons** are deactivated (because they can be part of these tests). Use the **Red "LEFT," Green "RIGHT"** and/or **Black "ENTER" Buttons** to select and *activate* the "**MINI-ICONS**" at the bottom of the display. In **Switch Test**, if the "<<" or ">>" *Mini-Icon* is *activated*, the display will go to (slip between) the previous tests (*Active & Dedicated Switch Tests*). Use either the **Red** or **Green Button** to select the "PREV" *Mini-Icon*. Press the **Black "ENTER" Button** to return to **Switch Test Menu**. To exit out of this Sub-Menu, select and *activate* the "PREV" *Icon* in the Menu. The **DIAGNOSTICS MENU** now appears with the "SW" *Icon* (**GO TO SWITCH MENU**) flashing. Go through other *Diagnostics* selections or exit.

To exit the **Portals™ Service Menu**, select & *activate* the "QUIT" *Icon* (see the next page).

QUIT THIS SESSION (Exiting the Portals™ Service Menu)

In the **MAIN MENU** and in all **SUB-MENUS**, if the "QUIT" *Icon* or "QUIT" *Mini-Icon* is selected and *activated*, the **Portals™ Service Menu Session** will be exited and returned to the **Attract Mode**.

The game will go into the same *Power-Up Routine* as if turning on the game. Upon **Power-Up**, the CPU Game Code & Display Code versions with Check-Sums are shown, followed by the Location ID & Game ID Numbers and Alerts, if any (see *Section 3, Chapter 2, GO TO DIAGNOSTICS MENU, Technician Alerts*).

The below **Problem / Solution Table** was designed to answer some common problems frequently asked.

Problem / Solution Table

PROBLEM	SOLUTION
Will not enter the Service Mode after depressing the Black "BEGIN TEST" Button .	<ul style="list-style-type: none"> • Check the Service Switch(es) (Red, Green & Black Buttons) for loose connections or bad Ground. • Check the associated wiring harness to/from the CPU/Sound Board, Connector CN6. • Check CPU/Sound Board for possible failure.
All Service Buttons (Red, Green and Black) appear nonfunctional.	<ul style="list-style-type: none"> • Check the Service Switches wiring harness for poor or no connection and/or broken wires.
The Green Service Button in the Attract Mode will not enter the SERVICE CREDITS MENU to add Service Credits.	<ul style="list-style-type: none"> • Check to make sure the Game is not in "Free Play." <i>If the game is set to Free Play, adding Service Credits is not required.</i> • Check the Service Switches wiring harness for poor or no connection and/or broken wires.
The Display "blanks out."	<ul style="list-style-type: none"> • Check the Dot Matrix Display for loose wiring harness for poor or no connection and/or broken wires. • Check F1 (3/4A Fuse) on the Display Power Supply Board. Refer to Section 5, Chapter 4, SCHEMATICS & TROUBLESHOOTING.
Icons "scroll" along continuously in the MAIN MENU .	<ul style="list-style-type: none"> • Check for a stuck switch on the Green Button. • If the Service Switch Set and/or the Coin Door was replaced, ensure the Locking Mechanism on the Green Button was removed. If the Green Button "clicks" and locks into an up/down position, the Green Button has this lock switch. Remove it. (Ref. to Svc. Bulletin #74.)
The Start and Flipper Buttons do not select or activate <i>Icons</i> in the SWITCH TEST MENU .	<ul style="list-style-type: none"> • This is normal. These switches are deactivated, as they are a part of the Switch Test. Use the Red "LEFT" or Green "RIGHT" & Black "ENTER" Buttons in this Sub-Menu. Refer to Section 3, Chapter 2, GO TO DIAGNOSTICS MENU, Switch Test.
Can't move selection of <i>Icon</i> with the Left and/or Right Flipper Buttons .	<ul style="list-style-type: none"> • Check the Flipper Buttons for loose connections or bad Ground and refer to Section 5, Chapter 2, Playfield Wiring, #-Flipper Circuit Wiring Diagram. • This is normal <i>only</i> in Diagnostic's Switch & Active Switch Tests (see <i>previous Problem</i>).
Some <i>Icons</i> appear non-functional in the PRINTER MENU(S) .	<ul style="list-style-type: none"> • If no printing equipment is connected, the "-" <i>Icon</i>, "+" <i>Icon</i> and "RUN" <i>Icon</i> will appear not to function. Refer Section 3, Chapter 3, GO TO PRINTER MENU.
Some <i>Icons</i> appear non-functional in the GAME SPECIFIC MENU under the DIAGNOSTICS MENU .	<ul style="list-style-type: none"> • If there is no other test under this Menu, the "<<" & ">>" <i>Mini-Icons</i> will appear not to function. The remaining <i>Icons</i> should function as normal. Note: <i>If there is no "Go To (Game Name) Test(s), the "GAME NAME" Icon will not invoke another display.</i>
The display returns to the ATTRACT MODE exiting the Service Session after a FACTORY RESET .	<ul style="list-style-type: none"> • This is normal. After a FACTORY RESET, the Service Session is automatically exited. Refer to Section 3, Chapter 6, GO TO RESET MENU, Factory Reset.
In COIL TEST MENU , the coils and flashlamps <i>do not</i> fire after activating the "RUN" <i>Icon</i> .	<ul style="list-style-type: none"> • Ensure the POWER INTERLOCK SWITCH is <i>pulled out</i> (see the start of this Chapter).
In ADJUSTMENTS MENU , with the Coin Door CLOSED , adjustments are not getting changed as desired (using the Flipper & Start Buttons).	<ul style="list-style-type: none"> • This is normal. The Memory Protect Switch is enabled when the Coin Door is CLOSED. Changes can be made with the Coin Door OPEN only.
In Portals™ Service Menu , the volume cannot be adjusted with the Red or Green Buttons .	<ul style="list-style-type: none"> • The Volume adjustment can only be made when in the Attract Mode. The Volume Mode is entered by pressing the Red "VOLUME" Button. Then use the Red "LEFT" to decrease / decrement (-) or Green "RIGHT" Button to increase / increment (+) the volume.
In Portals™ Service Menu , the display seems to lock up, or the Help Display appears to be non-functional.	<ul style="list-style-type: none"> • If you cannot clear the situation by exiting back one Menu, exit completely out of the Portals™ Service Menu, and re-enter. If the problem persists, call Technical Support for additional help.

Sec. 3: ...Menu Intro.

Go To Diagnostics Menu

Overview

The **Portals™ Service Menu System** provides tests for sounds, display, lamps, switches and coils. Each feature may be tested manually or automatically after entering the **Portals™ Service Menu** (see Chapter 1 of this Section). The automatic tests (e.g. **Cycling Coils, Test Flash Lamps**) may be used for a quick verification of automatic test functions and the manual tests (**Begin Play Test, Single Lamp / All / Row / Column Tests**, and **'Game Name' Tests**) may be used for troubleshooting. All *Icons* and there usages are explained throughout this chapter in order.

Important: Upon **Power-Up** (Game Reset) or opening the **Coin Door** watch the **Display** for any **Alerts**.*

OPEN THE DOOR

If this **display flashes**, the game is indicating that **CMOS RAM** memory (CPU Loc. U212) has been corrupted. This is caused be either failure in memory (e.g. **batteries are dead and/or faulty RAM**) or upon installation of updated version of game code. Opening the **Coin Door** will initiate a **Factory Restore (Reset)**, by opening the **Memory Protect Switch**.

Check battery voltage at **VBATT Test Point** on the **CPU/Sound Bd.** (more details in **Sec. 5, Chp. 4, PCBs**).

COIN DOOR IS OPEN
PLAYFIELD HIGH POWER
DISABLED BY
COIN DOOR INTERLOCK

This **flashing display** is shown immediately upon opening the **Coin Door** as a reminder that **20v/50v DC** power to the playfield is **disabled**. All electro-mechanical devices (such as **Coils**) **cannot be tested** with the switch pushed in. **PULL OUT** the **Power Interlock Switch ONLY** if you're in a **Testing Menu** requiring power. See **Access & Use** in Chapter 1 of this Section for the location of this switch. **Closing the Coin Door** will automatically reset this switch.

OPERATOR ALERT!
#2 AUTO LAUNCH
COIL MALFUNCTION

This **display** is shown momentarily during **Game Mode** or **Power-Up** to alert the operator of a coil malfunction (coil doesn't energize or coil fires a multiple number of times). **OPERATOR ALERT!** works by monitoring any switch activated coil that has the potential to trap a ball when disabled (more details in this Chapter, **Technician Alerts, Pages 24-25**).

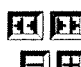

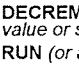

PLEASE CHECK
TECH REPORT
PORTALS->DIAG->TECH

* If this **Tech Report Alert flashes** (along with an audible sound), the game has detected faulty switches and/or missing pinballs. Select the "TECH" *Icon* for information (review **Technician Alerts, Pages 24-25**).
* For this **Alert display** to appear, **Standard Adj. 49, must be changed to POWERUP, COIN DOOR or POWERUP AND COIN DOOR**, the default is **NEVER** (review **Section 3, Chp. 4, GO TO ADJUSTMENTS MENU, Standard Adjustments, Page 44**).

CAUTION: Remove all pinballs from the Ball Trough prior to lifting the playfield to it's full upright position for servicing. **PULL OUT** the **Power Interlock Switch** for operation. To eject pinballs, select the "DIAG" *Icon* from the **MAIN MENU** to go to the **DIAGNOSTICS MENU**, then select the "CLR" *Icon* to enter the **CLEAR BALL TROUGH MENU**. Select the "RUN" *Mini-Icon* and press the **Black "ENTER" Button** or **Start Button** to remove one pinball at a time (this feature also useful to retrieve a pinball for game testing in **Begin Play Test & Game Specific Tests**).

EXPLANATION & USAGE OF COMMON LARGE & MINI-ICONS USED IN VARIOUS MENUS & SUB-MENUS:

Select and activate to:

								
MORE MORE		PREV	QUIT	HELP	Move LEFT or RIGHT, select previous / next or move backwards / forwards.	DECREMENT (-) or INCREMENT (+) displayed value or select previous / next.	RUN (or activate) selected test or coil PULSE coil.	View the schematic (DRAWing) of current display. Select while current switch, lamp or coil is viewed.
These non-selectable icons appear in the selected Menu only when there are MORE Icons to the LEFT or to the RIGHT available for selection.	Select and activate to return to the PREVIOUS Menu.	Select and activate to QUIT, exits & returns to the Attract Mode.	Select and activate to view HELP Screens of the current Menu*.	* Help Note: An explanation of each Mini-Icon at that menu level will cycle continuously. To exit a display where no Mini-Icons are available for selection, pressing any button will exit the display.				

GO TO DIAGNOSTICS MENU

After entering **Portals™**, the **MAIN MENU** now appears. To initiate, from the **MAIN MENU**, select the "DIAG" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** **Buttons** (the **Flipper Buttons** operates in the same manner) and press the **Black "ENTER" Button** (the **Start Button** operates in the same manner). The **DIAGNOSTICS MENU** appears. Continue through this chapter for the explanation & usage of the *Icons* in the **DIAGNOSTICS MENU**. **Usage Note:** Only in **Switch & Active Switch Tests**, the **Flipper & Start Buttons cannot be used** as the alternate navigation buttons as they are a part of these tests. After exiting these tests, the **Left & Right Flipper** and **Start Buttons** can once again be used. Continue through this chapter for the explanation & usage of the *Icons* in the **DIAGNOSTICS MENU**.

Go To Switch Menu

To initiate, from the **DIAGNOSTICS MENU**, select the "SW" *Icon* with either the Red "LEFT" or Green "RIGHT" **Buttons** and press the Black "ENTER" **Button**. Switches are configured in an 8 x 8 Matrix of Columns (Switch Drives) and Rows (Switch Returns) with up to 64 possible switches. The **SWITCH TEST MENU** consists of three (3) parts: **Switch Test, Active Switches & Dedicated Switch Test**. **Reminder: The Flipper & Start Buttons (part of Switch Tests) cannot be used as navigation buttons during these test(s)**

Switch Test

To initiate, from the **SWITCH MENU**, select the "TEST" *Icon* with either the Red or Green **Buttons** & press the Black **Button**. In **Switch Test**, close each switch and observe the display. The display will describe the switch in the Switch Matrix Grid (*below*), which includes the switch name, Return (Row) Wire, Drive (Column) Wire and the "Pin-Outs" from the **CPU/Sound Board**. When the switch is closed, the information is displayed momentarily. To view the schematic for the switch selected, press either the Red or Green **Button** to select the "DRAW" *Mini-Icon*. Press the Black **Button** to *activate* this *Mini-Icon*; do so while the switch is momentarily closed. To return to **Switch Test**, press the Black **Button** again.

Active Switch Test

To initiate, from the **SWITCH MENU**, select the "ACT" *Icon* with either the Red or Green **Buttons** & press the Black **Button**. If still in a previous test, select the "PREV" *Mini-Icon* to return to **SWITCH MENU** or select either of the "<<" or ">>" *Mini-Icons* to move through the tests. In **Active Switch Test**, if any switches are stuck closed (*or made from the presence of a pinball*), the display sequences through the Switch Names, Return (Row) Wire, Drive (Column) Wire, Drive Transistor, Part Number and the "Pin-Outs" from the **CPU/Sound Board**. This cycle continues until all switches are cleared or until the test is exited.

Dedicated Switch Test

To initiate, from the **SWITCH MENU**, select the "DED" *Icon* with either Flipper **Button** & press the Start **Button** (*the Service Switches are deactivated during this test.*). In **Dedicated Switch Test**, the display will describe the switch which includes the Switch Name, Return (Row) Wire, Drive (Column) Wire, Part Number and the "Pin-Outs" from the **CPU/Sound Board**.

Typical Switch Wiring & Schematic

Dedicated Switch Schematic

- ◻ = Switches above Playfield.
- ◼ = Switches below Playfield.
- = Switches not on Playfield.

Switch Part Notes: ¥ Yen Coin Switch is 180-5091-00. Part Numbers which start with 515- or 500- include the bracket, target, and/or housing.

Sw. 14, 15, 41 & 47 Part Note: OPTO PC Boards are used as Switches: Trans.: 515-0173-00 (Sw. 14 & 15); Receiver: 515-0174-00 (Sw. 14 & 15); Transmitter 515-7307-00 (Sw. 41); Rec. 515-7308-00 (Sw. 41); Transmitter 500-6746-00 (Sw. 47); Receiver 500-6747-00 (Sw. 47);

Sw. 56 Part Note: The Switch is comprised of a Hanger Bracket (535-5319-00) and Contact Wire (535-7563-01) located in the Cabinet.

Some Switch Diodes may be located under the playfield, in the Cabinet or Backbox on Terminal Strips or Diode Boards and not on the assemblies.

DOTS: D iode O n T erminal S trip, see Section 5, Chapter 2, Playfield Wiring.

Go To
Diagnostics Menu

Go To Coil Menu

To initiate, from the **DIAGNOSTICS MENU**, select the "COIL" *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. The coils are listed in groups. Coils **01-16** are typically High Current Coils (*although Low Current Coils may be used in these positions & will be noted*). Coils **17-32** are typically Low Current Coils. Flash Lamps are typically used in positions **26-32** (*although may be used in any position & will be noted*).

**COIN DOOR IS OPEN
PLAYFIELD HIGH POWER
DISABLED BY
COIN DOOR INTERLOCK**

PULL OUT the Power Interlock Switch for operation with the Coin Door open.

Important: The Partial Coils Detailed Chart Table is used as a reference against the Coil & Flash Lamp Locations on the next page. For the **complete Coils Detailed Chart Table**, see the reverse of the following page. The Chart is shown to compare against the Backbox I/O Power Driver Board Detailed Wiring Diagram (shown again in Sec. 5, Chapter 1, **Playfield Wiring**). For more on troubleshooting and diagnosing, see Sec. 5, Chapter 4, **Printed Circuit Boards**.

Single Coil Test

To initiate, from the **COIL MENU**, select the "TEST" *Icon* with either the **Red or Green Buttons** and press the **Black Button**. Ensure the **Power Interlock Switch** is pulled out. Select either the "-" or "+" *Mini-Icons*. Start with the "+" *Mini-Icon* to start the manual **Single Coil Test** from #1 (*the test runs through all Coils and Flash Lamps #1-#32 & Optional UK Only Auxiliary Positions AUX 1-3*). Press the **Black Button** on the "+" *Mini-Icon*, as each coil is selected, the display will describe the Coil or Flash Lamp Name with the corresponding number, the wire with colors, the "Pin-Outs" from the I/O Power Driver Board, the Coil Voltage and Gauge-Turns (*e.g. 23-800*). Press the **Black Button** again to move forward in the test. To test and view a particular Coil or Flash Lamp, select the "RUN" *Mini-Icon* and press the **Black Button**. Each time the **Black Button** is pushed, the Coil or Flash Lamp will fire on the Playfield and/or Backbox, with the display indicating the Coil or Flash Lamp information. Continue with the same procedure to run through the entire test.

Cycling Coil Test

To initiate, from the **COIL MENU**, select the "CYC" *Icon* with either the **Red or Green Buttons** and press the **Black Button**. If still in a previous test, select the "PREV" *Mini-Icon* to return to **COIL MENU** or select either of the "<<" or ">>" *Mini-Icons* to move to **Cycling Coil Test** (*selecting again will return to Coil Test*). The test pulses each regular Coil or Flash Lamp sequentially (*cycling*) on the Playfield and in the Backbox (*if Coils are used*). The display indicates **CYCLING COILS**.

⊖ **Coil Note:** ⊖ Either -00B or -00T can be used for coil replacements. B/T listed is preferable for easier diode access & may differ on game.

Backbox I/O Power Driver Board Detailed Wiring Diagram

Go To
Diagnostics Menu

Go To Lamp Menu

To initiate, from the **DIAGNOSTICS MENU**, select the "LAMP" *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. Controlled lamps are configured in an 8 x 10 Matrix of Columns (Lamp Drives) and Rows (Lamp Returns) with up to **80 lamps** possible. The Lamp Test Menu consists of four (4) parts: **Single Lamp Test, Test All Lamps, Row Lamp Test & Column Lamp Test**.

Single Lamp Test

To initiate, from the **LAMP MENU**, select the "ONE" *Icon* with either the **Red or Green Buttons** and press the **Black Button**. Select either the "-" or "+" *Mini-Icons*. Start with the "+" *Mini-Icon* to start the manual **Single Lamp Test** from Column 1, Row 1, Switch 1. Press the **Black Button** on the "+" *Mini-Icon*, as each lamp is selected, the lamp will light at its location on the playfield as well as the display, indicating the Lamp Matrix Grid Position (*below*), lamp name with the corresponding number, Return (Row) Wire & Color, Drive (Column) Wire & Color, and associated drive transistors. Press the **Black Button** again to move forward in the test. To test and view a particular lamp, select the "RUN" *Mini-Icon* and press the **Black Button**. Each time the **Black Button** is pushed, the lamp will light-up on the playfield, with the display indicating the lamp information. *Continue with the same procedure to run through the entire test.*

Test All Lamps

To initiate, from the **LAMP MENU**, select the "ALL" *Icon* with either the **Red or Green Buttons** and press the **Black Button**. If still in **Single Lamp Test** (or any 1 of the 4 tests), select the "PREV" *Mini-Icon* to return to **LAMP MENU** or select either of the "<<" or ">>" *Mini-Icons* to move through the tests, keep activating until **Test All Lamps** is displayed. The display will indicate **ALL LAMPS ON** and the lamps on the playfield will be lit, alternating between the rows in the Lamp Matrix Grid.

Row & Column Lamp Tests

To initiate, from the **LAMP MENU**, select the "ROW" or "COL" *Icon* with either the **Red or Green Buttons** and press the **Black Button**. If still in a previous test, select the "PREV" *Mini-Icon* to return to **LAMP MENU** or select either of the "<<" or ">>" *Mini-Icons* to move through the tests, keep activating until **Row or Column Lamp Test (whichever desired)** is displayed. In this test, each set of lamps in each Row or Column of the Lamp Matrix Grid (*respective to each test*) will light-up on the playfield and is indicated in the display.

◀ Playfield

Typical Lamp Wiring & Schematic

Bulb Types used for Lamps

- = Switches above Playfield.
- = Switches below Playfield.
- = Switches not on Playfield.

Lamp Part Notes: #555 Bulb Clear = 165-5002-00. #555 Bulb Green = 165-5054-04. #44 Bulb Clear = 165-5000-44.

See Section 4, Chapter 1, **Parts Identification & Location**, Pages 72-74 for more details on bulbs and corresponding sockets.

Some Lamp Diodes may be located under the playfield, in the Cabinet or Backbox on Terminal Strips and not on or with the Lamp Socket.

DOTS: Diode On Terminal Strip, see Section 5, Chapter 2, **Playfield Wiring**.

Go To
Diagnostics Menu

Test Flash Lamps

To initiate, from the **DIAGNOSTICS MENU**, select the "FLASH" *Icon* with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. After selecting this *Icon* the display will indicate **CYCLING FLASHERS**. The Flash Lamps will cycle continuously until the test is exited. This test allows the technician to easily spot any burned-out bulbs and replace them. Flashers tested are Flash Lamps in Positions: Q1-Q32 and in this game Flash Lamp(s) are : Q14, Q23, Q25-Q27 & Q29-Q32.

COIN DOOR IS OPEN
PLAYFIELD HIGH POWER
DISABLED BY
COIN DOOR INTERLOCK

PULL OUT the Power Interlock Switch for operation with the Coin Door open.

Clear Ball Trough

To initiate, from the **DIAGNOSTICS MENU**, select the "CLR" *Icon* with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. This Menu is provided to allow the technician a simple method of removing the balls from the trough and also, to test functionality of the trough, ensuring proper trough operation. After selecting this *Icon* the display will show a graphic of the ball trough with balls in the trough with its corresponding switch number. Select the "RUN" *Mini-Icon* to eject the ball in the first position. Simultaneously, the display and the playfield will eject the ball to the Trough Up-Kicker, eject from the Trough Up-Kicker into the Shooter Lane and will be ejected onto the playfield where the technician can easily retrieve the pinball or allow the ball(s) to re-enter the trough to continue **Clear Ball Trough Test**.

⚠ **CAUTION:** Continuous use of above test may overheat the Trough Up-Kicker Coil. ⚠

COIN DOOR IS OPEN
PLAYFIELD HIGH POWER
DISABLED BY
COIN DOOR INTERLOCK

PULL OUT the Power Interlock Switch for operation with the Coin Door open.

Technician Alerts

To initiate, from the **DIAGNOSTICS MENU**, select the "TECH" *Icon* with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. This Menu is provided to show any switch problems and/or missing pinballs.

After selecting this *Icon*, and if any of the below criteria is met, the display will indicate *any or all* of the following categories: **POSSIBLY BROKEN SWITCH**, **CHECK SWITCHES** and/or **HYPERSENSITIVE SWITCH** (*Sw. #16, Shooter Lane, is used as an example*). If more than one switch is reported, the Switch Number and Name will cycle within the category, and then will cycle the categories. To return to the **DIAGNOSTICS MENU**, select the "PREV" *Mini-Icon* and press the Black "ENTER" Button.

Switch Detection

During game play, activation of switches are monitored. In programming, every switch is given a minimum & maximum value based on the game. The switches are monitored every 5 minutes of game play with a "sliding window" of 15 minutes. If a switch is determined to be faulty, game play is compensated.

- Switches noted as **POSSIBLY BROKEN SWITCH** should be checked, then adjusted or replaced. **Important:** A switch reported as "possibly broken" may actually be an unused switch due to **lack of usage** and **not because they're broken**. This can happen, if a switch is located in a "hard" shot position, and the players are not making the shot. Game programming will still compensate for this unplayed switch.
- Switches noted as **CHECK SWITCHES** are determined to be stuck closed or open depending on switch usage. Free up the switch actuator adjust or replace if necessary.
- Switches noted as **HYPERSENSITIVE SWITCH** means just that, the switch should be readjusted or replace if necessary.

PLAYFIELD STATUS
HYPERSENSITIVE SWITCH
#02 SHOOTER LANE
PREVIOUS

Determination of switch usage can be checked in **Audits** (*review Section 3, Chapter 3, GO TO AUDITS MENU*). Find the associated Audit with the switch in question and check usage; compare it to commonly used switches for comparison. After any switch is checked and repaired or replaced, it's suggested to test the switch in the **PLAY TEST MENU** (*see the next page*) or **Single Coil Test** (*reviewed earlier in this chapter, Page 18*) where the associated coil to the switch can be tested as well. After correcting the problem, the switch will still be reported until the game is played and the switch is again monitored as specified above. *Only you can determine if a switch getting reported is bad or if the switch is currently not getting actuated during game play.*

Technicians Alerts continued on the next page.

Technician Alerts Continued

Pinball Detection

While in **Technician Alerts** Menu, if the following is displayed, the game has detected one (1) or more pinball(s) missing and has compensated for the lost pinball(s) to provide normal game play.

PLAYFIELD STATUS
PINBALL MISSING

PREVIOUS

Important: Determine where the pinball is! **Do not add pinball(s)** until it is determined the pinball(s) are indeed missing & not just stuck. If pinball(s) are added, & if the original stuck pinball has freed itself, the pinball game will not operate properly with the extra pinball(s). When the pinball is recovered, the above display **will not** appear the next time **Technician Alerts** is visited (a game must be played for the pinball to be determined as found).

During game play, a ball can get trapped or stuck. If after approximately 15 seconds of inactivity or "no scoring," **Ball Search** is started. **Note:** If the pinball is in the Plunger Lane or "held" on the flipper, no **Ball Search** will be performed. The game will perform one **Ball Search** in an attempt to "find" or free-up the pinball.

LOOKING FOR
PINBALLS
PLEASE WAIT 20

If the game does not see a switch closure (indicating the pinball has not been found), this display will appear with a count-down timer of 20 seconds, during which **Ball Search** will continue until the timer runs out (this feature will not happen if the game is in Competition Mode; **Ball Search** will continue until the pinball is found, unstuck and/or replaced

manually). The display will momentarily acknowledge the missing pinball(s). The game will provide another pinball into play and will compensate for the lost pinball. Game play will appear normal.

Note: This detection and compensation will happen with every pinball, if each suffers the same fate of a ball trap. If all balls get trapped, the game cannot be played or started until the situation is rectified.

Tech Report Alert Option

This game has the capability of **automatically alerting** the operator upon **Power-Up** and/or opening the **Coin Door** if any switch problems and/or missing pinballs has occurred. Review Section 3, Chapter 4, **GO TO ADJUSTMENTS MENU, Standard Adjustments**. The Standard Adjustment to change is 49. The default for this feature is **NEVER**. The options are: **POWERUP, COIN DOOR** or **POWERUP AND COIN DOOR**.

PLEASE CHECK
TECH REPORT
PORTALS->DIAG->TECH

Upon **Power-Up (Game Reset)** and/or opening the **Coin Door** (depending on the option selected), this **display** will flash three (3) times along with an audible sound. To find out the problem, enter this **Technicians Alert Menu** and wait for the displays.

Note: Coils **are not reported** in **Technician Alerts**, **h o w e v e r**, if a faulty switch is the culprit, the switch will then be reported. The below **display** is shown momentarily during **Game Mode** or **Power-Up** to alert the operator of a coil malfunction (coil doesn't energize or coil fires a multiple number of times). " **OPERATOR ALERT!** " works by monitoring any switch

OPERATOR ALERT!
#2 AUTO LAUNCH
COIL MALFUNCTION

activated coil that has the potential to trap a ball when disabled (e.g. in the **Auto Launch, Scoop, Eject, etc.**). This alert can also appear if a switch associated with a coil (example shown is #2 Auto Launch) is stuck closed (caused by a switch jam or stuck ball); the **CPU/Sound Board** will activate the coil approximately ten times and if the switch remains closed, the game will report this switch in **Technician Alerts** as **CHECK SWITCHES**. The display alert " **PLEASE CHECK TECH REPORT** " will be shown (only if **POWERUP, COIN DOOR** or **POWERUP AND COIN DOOR** is selected in Standard Adjustment 49).

Service Phone

To initiate, from the **DIAGNOSTICS MENU**, select the "SERV" Icon with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. After selecting this Icon the display will indicate a phone number to call if technical assistance is required (In USA Code: 1-800-KICKERS).

Begin Play Test

To initiate, from the **DIAGNOSTICS MENU**, select the "PLAY" Icon with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. After selecting this Icon the technician can test certain play functions to insure all switch activated coils function without entering game play. For example, by rolling the ball over the Shooter Lane switch, the Autoplunger should fire. If it kicks too early or too late, the switch actuator should be adjusted to compensate for this error. If it fails to fire, use the **Switch Test** or **Coil Test** to help determine the cause of the failure. During this Play Test, check all coil assemblies with related switches in the game. For unique Game Test(s), select the "Ring" Icon in the **DIAGNOSTICS MENU**, reviewed on Pages 27-28.

THE LORD OF THE RINGS
Section 3, Chapter 2
Page 25

Fire KNOCKER

To initiate, from the **DIAGNOSTICS MENU**, select the "KNOCKER" *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. The digitally mastered "Knocker" is sounded.

Sound / Speaker Test

To initiate, from the **DIAGNOSTICS MENU**, select the "SPKR" *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. The BSMT 2000 Sound System produces true digital stereo sound from Backbox & Cabinet Speakers or "Mono" on the Cabinet Speaker (when used by itself). After selecting this *Icon*, select the "-" or "+" *Mini-Icons* and press the **Black "ENTER" Button** to activate the first test. Repeat to visually see & hear all tests. Select the "RUN" *Mini-Icon* to activate the test chosen without moving to the next test.

Note: During Sound Tests, the display shows the speaker identification and the corresponding sound(s). The sound functions allow verification that both channels are functioning properly & that the speaker connections are correct.

Speaker Phase Testing

Connections to each of speakers are polarized and each must be connected appropriately for the best quality sound. If one speaker has the positive and negative connections reversed with respect to the other one, bass frequencies will not be produced properly and the overall sound quality will be poor. To test for proper speaker phasing, use the sound test to cycle through the Backbox & Cabinet, and Backbox Sine (repeated) functions. If the Cabinet Sine produces more volume and bass than the Left Sine, the speakers are connected properly. If it produces the same or less, one speaker is connected improperly. To isolate and correct reversed speaker connections, one of two methods may be used.

1. Check each speaker for polarity markings. If the speakers have polarity markings, verify that the Backbox Speaker **RED-WHT** Wire and the Cabinet Speaker **YEL-WHT** Wire is connected to the negative (-) terminal.
2. Disconnect the speaker output connector from the CPU / Sound Board and connect a 1.5-volt battery across each speaker pair one at a time while observing the speakers. Make sure the positive battery terminal is connected to the positive lead (CN4, Pin-3 (**RED-BLK**) or Pin-6 (**YEL-BLK**)) each time. As the connection is made, check speaker cone movement; proper connections are indicated by outward movement.

Note: For ROM Usage (Summary Table) & Locations, see Page DR.

① in the "Find-It-In-Front: Dr. Pinball Section". Voice ROMs (U17, U21, U36 and/or U37) which are 8MB must have a Jumper at W6 on the CPU/Sound Board to function properly.

Auto / Manual Tests	Sounds Produced
Speaker Test	Tone
Sound/OPSYS EPROM (Loc. U7)	Level 1-3+ (Music Test)
Voice ROMs: 1 (U17) 2 (U21) 3 (U36) 4 (U37)	Speech Pattern 1-3+

Begin Burn In

To initiate, from the **DIAGNOSTICS MENU**, select the "BURN" *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. After selecting this *Icon* the **Begin Burn-In Test** will start. At this stage the game will exercise all CPU I/O Functions (**Dot Matrix Display Test, Coil Testing, Lamp Testing, Sound...**, etc.). This is provided to constantly exercise sounds, coils, etc... Cumulative Burn-In minutes will be displayed. **Note:** To reset Burn-In minutes to 00 see Section 3, Chapter 6, GO TO RESET MENU, Factory Reset. **Caution:** Performing a Factory Reset will reset all other information as well.

Dot Matrix Test

To initiate, from the **DIAGNOSTICS MENU**, select the "DOT TEST" *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. After selecting this *Icon* the **Dot Matrix Test** immediately begins. **Note:** Pressing any button will exit the test & return to **DIAGNOSTICS MENU**. The display will immediately illuminate & cycle for 1 pass of each test continuously for each of the following:

Test 1

Illuminates 1 vertical column of dots, turning it off & illuminating the next column, until each column has been individually lit, while the other columns are off.

Test 2

Illuminates 1 horizontal row of dots, turning it off & illuminating the next row, until each row has been individually lit, while the other rows are off.

Dot Matrix Test Continued

Test 3

Illuminates all the dots, except for one column from left to right.

Test 4

Illuminates all the dots, except for one row from top to bottom.

Test 5

Illuminates every other dot lit, in both the rows and columns.

Note: Pressing the Red, Green, Black or Flipper Buttons will exit the test & return to **DIAGNOSTICS MENU**.

Dot Matrix Display Explained

The display utilizes a **Micro-Processor Control Board** mounted in piggyback fashion to the **Dot Matrix Display (128 X 32) Driver Board**. The purpose behind this board is to provide more information to the operator as well as displaying graphics to the player.

The board is controlled by a **6809E Microprocessor** and its personality ROM (Unique to the Game). It receives Data, Reset & Clock Information from the **CPU/Sound Board** via the ribbon cable and sends back multiple Status and Busy Signals to the **CPU**. This is to insure synchronized communication between the **CPU** and the **Display Controller Board**. The Drivers for the rows and columns are provided on 5 surface mounted integrated circuits on the **Dot Matrix Display Driver Board**.

Sec. 3: ... Diagnostics

Go To Fuse Table

To initiate, from the **DIAGNOSTICS MENU**, select the "FUSES" *Icon* with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. The **FUSE TABLE MENU** now appears. This provides the technician with the current **Fuse Table** for this game (also noted on a decal in the Backbox). The fuses are located in the Backbox (on the **Display Power Supply Board** and the **I/O Power Driver Board**), and also in the Cabinet (under the playfield by the Flippers and/or by any unique assembly requiring an additional fuse, such as magnets). For the complete **Fuse List** in the **Quick Reference Fuse Chart & Pictorials**, see the next page or Page DR. 1 (front of this manual).

Example:

After entering **Portals™**, the **MAIN MENU** now appears with the "DIAG" *Icon* (**GO TO DIAGNOSTICS MENU**) flashing:

Press the Black "ENTER" Button to *activate* this **ICON**. The **DIAGNOSTICS MENU** now appears with the "SW" *Icon* (**GO TO SWITCH MENU**) flashing; use the Red "LEFT" or Green "RIGHT" Buttons, until the "FUSES" *Icon* (**GO TO FUSE TABLE**) is flashing:

Press the Black Button to *activate* this **ICON**. The **FUSE TABLE** now appears.

Select and *activate* the "+" *Mini-Icon* to view the next fuse in the group. Continue to select either the "+" or "-" *Mini-Icons* to view each fuse one at a time. The display will describe the fuse identification number (e.g. Main, F1, F6, F7, etc.), rating of fuse (e.g. 5A 250v S.B. - i.e. 5 Amp, 250 volt, Slo-Blo), location of fuse (i.e. Backbox: Board Name located on; or Cabinet: Under the playfield or in Service Outlet), and 'use of fuse' (e.g. 90v DC High Voltage Power, etc.). The current fuse listed will remain in the display until the next fuse is chosen or when the Sub-Menu is exited by selecting & *activating* the "PREV" or "QUIT" *Mini-Icons*.

Go To Fuse Table continued on the next page.

Backbox PCB Fuses, ROMs, Bridges, Relays, P/F & Cabinet Fuses, Cab. Switches

CAUTION: For continued protection against risk of fire, replace only with same type of fuse having the same electrical rating!

Dr. Pinball

To initiate, from the **DIAGNOSTICS MENU**, select the Cross "DR." *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. This will bring you (the operator / technician) into **DR. PINBALL (Flow Chart Menus)** which offers you a choice of three (3) *Icons*: Coil "DR.", Switch "DR." and Lamp "DR." *Icons*. Selecting a particular *Icon* will give you a choice of which specific Coil (*any and all coil assemblies such as Flippers, VUKs, Magnets, etc.*), Switch or Lamp circuit needs to be diagnosed. *Dr. Pinball* will now display a question or give a procedure to follow such as "Does the lamp turn on?" or "Check bridge rectifier BR-20, if short replace." When *Dr. Pinball* displays a question or requests a procedure, *Dr. Pinball* will expect a response such as "NO" or "YES" (*see below examples of the Mini-Icons* which will prompt the operator). You the operator/technician must respond by using the **Red or Green Buttons** to "SELECT" a *Mini-Icon* and the **Black Button** to "ACTIVATE or ENTER" your selection.

Coil Flow Chart

To initiate, from the **DR. PINBALL MENU**, select the Coil "DR." *Icon* with either the **Red or Green Buttons** and press the **Black Button**. This is the **Coil Flow Chart**. Follow the questions, answering by using the *Mini-Icons* in the display.

Switch Flow Chart

To initiate, from the **DR. PINBALL MENU**, select the Switch "DR." *Icon* with either the **Red or Green Buttons** and press the **Black Button**. This is the **Switch Flow Chart**. Follow the questions, answering by using the *Mini-Icons* in the display.

Lamp Flow Chart

To initiate, from the **DR. PINBALL MENU**, select the Lamp "DR." *Icon* with either the **Red or Green Buttons** and press the **Black Button**. This is the **Lamp Flow Chart**. Follow the questions, answering by using the *Mini-Icons* in the display.

The following are the *Mini-Icons* with explanations for the **DR. PINBALL** Sub-Menus:

Select and *activate* either the "-" or "+" *Mini-Icons* to diagnose a Coil, Lamp or Switch. Select and *activate* the "RUN" *Mini-Icon* to test selected item. The "PREV" *Mini-Icon* allows you to go back to previous question. Select the "QUIT" *Mini-Icon* to exit **Portals™** completely. Select the "?" *Mini-Icon* (Help) to see directions on button usage.

Select and *activate* either the "NO" or "YES" *Mini-Icons* to answer a question given. Select and *activate* the "END" *Mini-Icon* to change to a new item to test. The "PREV" *Mini-Icon* allows you to go back to previous question. Select the "QUIT" *Mini-Icon* to exit **Portals™** completely. Select the "?" *Mini-Icon* (Help) to see directions on button usage.

After a diagnosis is given, select and *activate* the "END" *Mini-Icon* to change to a new item to test. The "PREV" *Mini-Icon* allows you to go back to previous display. Select the "QUIT" *Mini-Icon* to exit **Portals™** completely. Select the "?" *Mini-Icon* (Help) to see directions on button usage.

In **COIL FLOW CHART MENU**, select and *activate* the "PULSE" *Mini-Icon* to pulse the coil selected. Select and *activate* the "END" *Mini-Icon* to change to a new item to test. The "PREV" *Mini-Icon* allows you to go back to previous question. Select the "QUIT" *Mini-Icon* to exit **Portals™** completely. Select the "?" *Mini-Icon* (Help) to see directions on button usage.

Go To Audits Menu

Overview

The Portals™ Service Menu System provides 224 Audits for accounting purposes and for evaluation of Game Programming. The Audits are divided into 3 groups: • Earnings Audits (Audits 01-14), • Standard Audits (Audits 01-68) and • Feature Audits (Programming Use Only) (Audits 01-144). For details on Tournament Audits, see Section 3, Chapter 7, GO TO TOURNAMENT MENU. Audits which are named Proprietary are also for Future Expansion or Programming. Game code may get upgraded during production; compare all Audits in the display with the manual and make any corrections to the Audit Table (previous page), as necessary. Audits are subject to change (with or without notice). To view Audits in the display, enter the Portals™ Service Menu System. For how to RESET Audits, see Section 3, Chapter 6, GO TO RESET MENU.

EXPLANATION & USAGE OF COMMON LARGE & MINI-ICONS USED IN VARIOUS MENUS & SUB-MENUS:

These non-selectable icons appear in the selected Menu only when there are MORE icons to the LEFT or to the RIGHT available for selection.

Select and activate to return to the PREVIOUS Menu.

Select and activate to QUIT, exits & returns to the Attract Mode.

Select and activate to view HELP Screens of the current Menu*.

Move LEFT or RIGHT, select previous / next or move backwards / forwards.

Select and activate to:

* Help Note: An explanation of each Mini-Icon at that menu level will cycle continuously. To exit a display where no Mini-Icons are available for selection, pressing any button will exit the display.

GO TO AUDITS MENU

After entering Portals™, the MAIN MENU now appears. Select the "AUD" Icon in the MAIN MENU with either the Red "LEFT" or Green "RIGHT" Buttons (the Flipper Buttons operates in the same manner) and press the Black "ENTER" Button (the Start Button operates in the same manner). The AUDITS MENU appears. Continue through this chapter for the explanation & usage of the Icons in the AUDITS MENU.

Earnings Audits (01-14)

To initiate, from the AUDITS MENU, select the "EARN" Icon with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. Select and activate either of the ">>" Mini-Icons to view the next or previous Audit in this group. The display will describe the Audit Number, Audit Name and the Current Audit Total (Value). The current Audit will remain in the display until the next Audit is viewed or when this Menu is exited.

Nr.	EARNINGS AUDIT NAME: Definition
01	TOTAL PAID CREDITS: Provides the total number of Paid Credits.
02	FREE GAME PERCENTAGE: Provides the percentage total by dividing Standard Audit 13, TOTAL FREE PLAYS, by Standard Audit 14, TOTAL PLAYS.
03	AVERAGE BALL TIME: In seconds, the average ball time is derived from the total play time divided by Standard Audit 01, TOTAL BALLS PLAYED.
04	AVERAGE GAME TIME: The average game time is expressed in minutes and seconds (0:00).
05	COINS THRU LEFT SLOT: Provides the total number of times Coin Mechanism Switch 06 was closed.
06	COINS THRU RIGHT SLOT: Provides the total number of times Coin Mechanism Switch 04 was closed.
07	COINS THRU CENTER SLOT: Provides the total number of times Coin Mechanism Switch 05 was closed.
08	COINS THRU 4TH SLOT: Provides the total number of times Coin Mechanism Switch 02 was closed.
09	COINS THRU 5TH SLOT: Provides the total number of times Coin Mechanism Switch 07 was closed.
10	COINS THRU 6TH SLOT: Provides the total number of times Coin Mechanism Switch 03 was closed.
11	TOTAL COINS: Provides the total amount of coins registered through all the Coin Slots.
12	TOTAL EARNINGS: The total cash value accumulated since the last Factory Reset occurred. See Section 3, Chapter 6, GO TO RESET MENU, Reset Coin Audits.
13	METER CLICKS: Provides the total number of money clicks accumulated. Based on the country's lowest coin denomination used for the game credit.
14	SOFTWARE METER: Provides the continuing total of Meter Clicks. This audit cannot be reset; the display shows the constant addition of Meter Clicks.

Standard Audits (01-68)

To initiate, from the **AUDITS MENU**, select the "S.P.I." *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Buttons** and press the **Black "ENTER" Button**. Select and *activate* either of the ">>" *Mini-Icons* to view the next or previous Audit in this group. The display will describe the **Audit Number**, **Audit Name** and the **Current Audit Total (Value)**. The current Audit will remain in the display until the next Audit is viewed or when this Menu is exited.

Nr.	STANDARD AUDIT NAME: Definition
01	TOTAL BALLS PLAYED: Provides the total number of <i>Regular</i> and <i>Extra Balls</i> .
02	TOTAL EXTRA BALLS: Provides the total number of <i>Extra Balls</i> awarded.
03	EXTRA BALLS PERCENT: Provides the percentage total by dividing Standard Audit 02, TOTAL EXTRA BALLS , by Standard Audit 14, TOTAL PLAYS .
04	REPLAY 1 AWARDS: Provides the total <i>Awards (Credits, Extra Balls or Scores)</i> for Level 1.
05	REPLAY 2+ AWARDS: Provides the total <i>Awards (Credits, Extra Balls or Scores)</i> for Level 2 or higher.
06	TOTAL REPLAYS: Provides the total <i>Awards (Credits, Extra Balls or Scores)</i> for exceeding <i>Replay Score Levels</i> .
07	REPLAY PERCENT: Provides the percentage total from dividing Standard Audit 06, TOTAL REPLAYS , by Standard Audit 14, TOTAL PLAYS . The percentage reflects replay total awards for exceeding replay score levels.
08	TOTAL SPECIALS: Provides the total <i>Awards (Credits, Extra Balls, or Scores)</i> for making <i>Specials</i> .
09	SPECIAL PERCENT: Provides the percentage total by dividing Standard Audit 08, TOTAL SPECIALS , by Standard Audit 14, TOTAL PLAYS .
10	TOTAL MATCHES: Provides the total <i>Credits</i> awarded for matching the last two digits of the score with the <i>System-Generated Match Number</i> at the end of the game. Percentage of <i>Match Credits</i> is adjustable from 0% to 10% by Standard Adjustment 13, MATCH PERCENTAGE , if enabled. <i>See Section 3, Chapter 4, GO TO ADJUSTMENTS MENU, Standard Adjustments.</i>
11	HIGH SCORE AWARDS: Provides the total <i>Awards (Credits, Extra Balls, or Scores)</i> for exceeding the <i>High-Score-To-Date</i> scores.
12	HIGH SCORE PERCENT: Provides the percentage total by dividing Standard Audit 11, HIGH SCORE AWARDS , by Standard Audit 14, TOTAL PLAYS .
13	TOTAL FREE PLAYS: Provides the total <i>Free Credits</i> for <i>Replays, High-Score-To-Date, Specials and Match</i> .
14	TOTAL PLAYS: This total is derived by adding the sum of Earnings Audit 01, TOTAL PAID CREDITS , and Standard Audit 13, TOTAL FREE PLAYS . <i>Note: Free Credits are not recorded in the Audit until they are actually used.</i>
15	0-1.9M SCORES: Provides the total number of games the Player's final score was 0 and 1,999,990 points.
16	2M-3.9M SCORES: ... and the Player's final score was between 2,000,000 and 3,999,990 points.
17	4M-5.9M SCORES: ... and the Player's final score was between 4,000,000 and 5,999,990 points.
18	6M-7.9M SCORES: ... and the Player's final score was between 6,000,000 and 7,999,990 points.
19	8M-9.9M SCORES: ... and the Player's final score was between 8,000,000 and 9,999,990 points.
20	10M-12.4M SCORES: ... and the Player's final score was between 10,000,000 and 12,499,990 points.
21	12.5M-14.9M SCORES: ... and the Player's final score was between 12,500,000 and 14,499,990 points.
22	15M-17.4M SCORES: ... and the Player's final score was between 15,000,000 and 17,499,990 points.
23	17.5M-19.9M SCORES: ... and the Player's final score was between 17,500,000 and 19,999,990 points.
24	20M-22.4M SCORES: ... and the Player's final score was between 20,000,000 and 22,499,990 points.
25	22.5M-24.9M SCORES: ... and the Player's final score was between 22,500,000 and 24,999,990 points.
26	25M-34.9M SCORES: ... and the Player's final score was between 25,000,000 and 34,999,990 points.
27	35M-49.9M SCORES: ... and the Player's final score was between 35,000,000 and 49,999,990 points.
28	50M-74.9M SCORES: ... and the Player's final score was between 50,000,000 and 74,999,990 points.
29	75M-99.9M SCORES: ... and the Player's final score was between 75,000,000 and 99,999,990 points.
30	100M-149.9M SCORES: ... and the Player's final score was between 100,000,000 and 149,999,990 points.
31	150M+ SCORES: Provides the total number of games the Player's final score was 150,000,000 points and over.
32	AVERAGE SCORES: This total is derived from adding the <i>Final Score</i> of each game to a table and dividing this sum by Standard Audit 14, TOTAL PLAYS .

Standard Audits 33-68 continued on the next page.

Sec. 3: Go To Audits

Standard Audits Continued.

STANDARD AUDIT NAME: Definition

- 33 SERVICE CREDITS:** Provides the total number of times the **Portals™ Green Button** (Dedicated Switch 7) was pushed in **Attract Mode**.
See Section 3, Chapter 1, Service Switch Set Access & Use, for how to receive Service Credits.
See Sec. 3, Chp. 6, GO TO RESET MENU, Reset Credits, for how to delete Service (and Paid Credits).
- 34 BALL SEARCH STARTED:** Provides the total number of times the game performed a *Ball Search*.
- 35 LOST BALL FEEDS:** Provides the total number of times the game added a pinball to play when it could not find a pinball after *Ball Search*.
See Section 3, Chapter 2, GO TO DIAGNOSTICS MENU, Technicians Alert [Pinball Detection].
- 36 LOST BALL GAME STARTS:** Provides the total number of times the game started with a pinball missing from the ball trough at the start of a game.
See Section 3, Chapter 2, GO TO DIAGNOSTICS MENU, Technicians Alert [Pinball Detection].
- 37 LEFT DRAINS:** Provides the total number of times Rollover Switch 57 was closed.
- 38 CENTER DRAINS:** Provides the total number of times the pinball had drained when the last switch closed was not Switch 57 or Switch 60.
- 39 RIGHT DRAINS:** Provides the total number of times Rollover Switch 60 was closed.
- 40 TILTS:** Provides the total number of times Contact Switch 56 was closed.
- 41 TOTAL BALLS SAVED:** Provides the total number of times this feature was used (*this feature can be turned ON or OFF, see Standard Adj. 38, FREEZE TIME in Section 3, Chapter 4, GO TO ADJUSTMENTS MENU, Standard Adjustments*). This feature is enabled at the start of each pinball and is disabled as soon as a predetermined number of switches are "closed" **or** the allocated time has expired.
- >> **42 - 49 PROPRIETARY:** Proprietary Audits are used for *Future Expansion* or *Programming*.
- 50 BASE REPLAY:** Provides the current base *Replay Level Score*.
- 51 LEFT FLIPPER USED:** Provides the total number of times the **Left Flipper Button** (Dedicated Switch 1) was pushed in **Game Mode**.
- 52 RIGHT FLIPPER USED:** Provides the total number of times the **Right Flipper Button** (Dedicated Switch 3) was pushed in **Game Mode**.
- >> **53 - 54 PROPRIETARY:** Proprietary Audits are used for *Future Expansion* or *Programming*.
- 55 0 - 1 MINUTE GAMES:** Provides the total number of games the total game time was between 0:00 and 1:00 minute.
- 56 1 - 1.5 MINUTE GAMES:** Provides the total number of games the total game time was between 1:00 and 1:30 minutes.
- 57 1.5 - 2 MINUTE GAMES:** Provides the total number of games the total game time was between 1:30 and 2:00 minutes.
- 58 2 - 2.5 MINUTE GAMES:** Provides the total number of games the total game time was between 2:00 and 2:30 minutes.
- 59 2.5 - 3 MINUTE GAMES:** Provides the total number of games the total game time was between 2:30 and 3:00 minutes.
- 60 3 - 3.5 MINUTE GAMES:** Provides the total number of games the total game time was between 3:00 and 3:30 minutes.
- 61 3.5 - 4 MINUTE GAMES:** Provides the total number of games the total game time was between 3:30 and 4:00 minutes.
- 62 4 - 5 MINUTE GAMES:** Provides the total number of games the total game time was between 4:00 and 5:00 minutes.
- 63 5 - 6 MINUTE GAMES:** Provides the total number of games the total game time was between 5:00 and 6:00 minutes.
- 64 6 - 8 MINUTE GAMES:** Provides the total number of games the total game time was between 6:00 and 8:00 minutes.
- 65 8 - 10 MINUTE GAMES:** Provides the total number of games the total game time was between 8:00 and 10:00 minutes.
- 66 10 - 15 MINUTE GAMES:** Provides the total number of games the total game time was between 10:00 and 15:00 minutes.
- 67 15+ MINUTE GAMES:** Provides the total number of games the total game time was 15:00 and over.
- 68 RECENT REPLAY PERCENT:** *Percent figured with programming thresholds for a determined number of games (again based on programming thresholds). The percentage reflects replay total awards for exceeding replay score levels.*

Sec. 3: Go To Audits

Go To
Audits Menu

Feature Audits (01-144)

To initiate, from the **AUDITS MENU**, select the "LOTR" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** **Buttons** and press the **Black "ENTER" Button**. Select and *activate* either of the ">>" *Mini-Icons* to view the next or previous Audit in this group. The display will describe the **Audit Number**, **Audit Name** and the **Current Audit Total** (Value). The current Audit will remain in the display until the next Audit is viewed or when this Menu is exited. **Audits Definition: Programming Use Only.** *The proprietary information provides the total number of times a feature was started, awarded, lit, played and/or completed (awarded); also, the total number of Switch Closures during certain modes or features are tracked (a predetermined single/multiple variations of switch closures are used to determine the lighting and/or completion of the feature stated).*

Note: Audits are subject to change (with or without notice).

Go To Printer Menu (OPTIONAL USE ONLY)

Operational Usage Note: The use of the following Sub-Menus are **OPTIONAL** and provided as a convenience only. **No special equipment or unique software (mentioned below) was included with your Pinball Game.** To initiate, from the **AUDITS MENU**, select the "PRNT" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** **Button** and press the **Black "ENTER"** **Button**. The **PRINTER MENU** appears. A **Printer Interface Board, "Hand-Held" Printer & the Alison Interface Program** are required for proper operation of these Sub-Menus. *Entering the menus & selecting/activating the Icons without the equipment mentioned, will not affect the Pinball Game nor the operation of the Portals™ Service Menu System in any way.* For information or details on the required equipment in this Menu, call or eMail Technical Support (*contact info on the back cover*).

Quick Printout

To initiate, from the **PRINTER MENU**, select the "QUIK" *Icon* with either the **Red** or **Green Button** and press the **Black Button**. Select either the "-" or "+" *Mini-Icon* and press the **Black Button** to start the printout. Per the display instruction, the **Start Button** can also be pressed to start the printout. Only the **Earnings Audits** can be retrieved and/or printed for further processing.

Full Printout

To initiate, from the **PRINTER MENU**, select the "ALISON" *Icon* with either the **Red** or **Green Button** and press the **Black Button**. Select either the "-" or "+" *Mini-Icon* and press the **Black Button** to start the download. Per the display instruction, the **Start Button** can also be pressed to start the download. All **Earnings, Standard & Feature Audits** can be retrieved and/or printed for further processing.

Reset Printer

To initiate, from the **PRINTER MENU**, select the "RESET" *Icon* with either the **Red** or **Green Button** and press the **Black Button**. Select either the "-" or "+" *Mini-Icon* and press the **Black Button** to clear the "Nº of copies printed" count total appearing in the display. **Operational Usage Note:** *Activating the "QUIK" Icon (in the previous Quick Printout) without the special equipment and unique software, will still provide a "count total" in this Reset Printer Menu, which does not affect the operation of the Portals™ Service Menu System in any way.* Activating this "RESET" *Icon* will reset the "count total" in the display to 00.

Shortcut to Standard Adjustment 31.

Go To Adjustments Menu

Overview

The Portals™ Service Menu System provides 84 Adjustments to vary Game Functions to customize for your particular needs. The Adjustments are divided into 2 groups: • **Standard Adjustments (01-52)** and • **Feature Adjustments (01-27)**. Game code may get upgraded during production; compare all Adjustments in the display with the manual and make any corrections to the Adjustment Table (*previous page*), as necessary. Adjustments are subject to change (*with or without notice*). To view Adjustments in the display, enter the **Portals™ Service Menu System**. When a change is made and then the next / previous Adjustment is selected (*or the Sub-Menu is exited*), the display will momentarily flash **REQUEST INSTALLED**. For further customization of **Game Play Difficulty** or **Game Play Type** or how to **RESET ONLY** the Adjustments, see Section 3, Chapter 5, **GO TO INSTALLS MENU**.

Important: The Coin Door must be **OPEN** allowing the Memory Protect Switch to be disabled, so any Adjustment changes can be made.

EXPLANATION & USAGE OF COMMON LARGE & MINI-ICONS USED IN VARIOUS MENUS & SUB-MENUS:

These non-selectable icons appear in the selected Menu only when there are MORE icons to the LEFT or to the RIGHT available for selection.

Select and activate to return to the PREVIOUS Menu.

Select and activate to QUIT, exits & returns to the Attract Mode.

Select and activate to view HELP Screens of the current Menu*.

Select and activate to:
 Move LEFT or RIGHT, select previous / next or move backwards / forwards.
 DECREMENT (-) or INCREMENT (+) displayed value or select previous / next.

* Help Note: An explanation of each Mini-Icon at that menu level will cycle continuously. To exit a display where no Mini-Icons are available for selection, pressing any button will exit the display.

GO TO ADJUSTMENTS MENU

After entering Portals™, the MAIN MENU now appears. Select the "ADJ" Icon in the MAIN MENU with either the Red "LEFT" or Green "RIGHT" Buttons (the Flipper Buttons operates in the same manner) and press the Black "ENTER" Button (the Start Button operates in the same manner). The ADJUSTMENTS MENU appears. Continue through this chapter for the explanation & usage of the Icons in the ADJUSTMENTS MENU.

Standard Adjustments (01-52)

To initiate, from the ADJUSTMENTS MENU, select the "S.P.I." Icon with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. Select and activate either of the ">>" Mini-Icons to view the next or previous Adjustment in this group. Select and activate either of the "-" or "+" Mini-Icons to change the setting, if desired (*the Default Setting is noted in the definitions below*). The display will describe the Adjustment Number, Adjustment Name and the Current Adjustment Setting. The current Adjustment will remain in the display until the next Adjustment is view or when this Menu is exited.

WARNING: Changes made in any Adjustments will be lost after a FACTORY RESET or removal of the CPU/Sound Board Batteries.

Nr.	STANDARD ADJUSTMENT NAME: Definition
	REPLAY TYPE: Set to AUTO, DYNAMIC, FIXED or NONE. Default is AUTO. Selecting NONE will make Standard Adjustments 2-5 NOT AVAILABLE . Selecting FIXED will make Standard Adjustment 2 NOT AVAILABLE . If selected AUTO, DYNAMIC or FIXED, you will need to then select the number of Replay Levels and Score Threshold (<i>in Standard Adj. 4</i>) desired for the player to receive a Replay Award (<i>select type in Standard Adj. 3</i>). The Default Score appears as a starting point after the Level amount is selected. AUTO & DYNAMIC will then get based on the Replay Percentage (<i>in Standard Adjustment 2</i>).
01	• Select FIXED to give the player a Replay Award as the Score Threshold is reached. This Score Threshold will not adjust up or down. • Select AUTO to give the player a Replay Award as the Score Threshold is reached. This Score Threshold will automatically adjust up or down based on the Replay Percentage chosen (<i>in Std. Adj. 2</i>). The game periodically adjusts based upon the Player Base Skill Level. • Select DYNAMIC to give the player a Replay Award as the Score Threshold is reached. This Score Threshold will go down every game based on the Replay Percentage selected. For (Dynamic) example, if the Score Threshold is 50,000,00 and the Replay Percentage selected is 10%, every game a player does not reach the Score Threshold, the score to reach will drop by 5,000,000 (10% of 50M). This will continue every game until the Threshold Score is reached. Thus, if the score then drops to 15,000,000 after 7 games and is then achieved, the Replay Award is given. The original Score Threshold is added to 15,000,000 and is now 65,000,000. It will then take the same player 10 games to reach 15,000,000.
02	REPLAY PERCENTAGE: Set between 01% - 50. Default is 10%. This Adjustment is required if Standard Adjustment 1 is set to AUTO or DYNAMIC .

Standard Adjustments 03-11 continued on the next page.

Go To Adjustments Menu

Standard Adjustments Continued.

STANDARD ADJUSTMENT NAME: Definition

03 REPLAY AWARD: Set to **EXTRA BALL, CREDIT, TICKET*** or **TOKEN***. Default is **CREDIT**. Select **EXTRA BALL** if awarding a **CREDIT, TICKET/TOKEN** is prohibited in your area.

**TICKET or TOKEN is selected, the game will require an optional Ticket or Token Dispenser
If selected Token, then Standard Adjustment 46, Q24 Option, must be changed accordingly.*

04 REPLAY LEVELS: Set between **1 - 4** for the number of Replay Levels to be active. Default is **1**.
A "Drop-Down" Table appears showing Replay Level 1. Adjust the Replay Level between **10M - 9.99B** (Default Score appears as a starting point) using the "-" or "+" Mini-Icons, then use the ">>" Mini-Icon to go to next Level (if selected more than 1) and select the next highest Threshold Score(s) desired.

05 REPLAY BOOST: Set to **YES** or **NO**. Default is **YES**. This Adjustment works only when Standard Adjustment 1, Replay Type, is set to **FIXED** or **AUTO**.
When set to **YES**, while **FIXED** or **AUTO** maintains the Replay Levels, Replay Boost works as follows: If the Replay Level is **7,000,000** (regardless of the Replay Percentage), and the Player scores **20M**, and receives the Replay Award, the next game the Current Replay Level is added to this base. Thus the next game, the Replay Level is **14,000,000**. The Player again scores **20M**. The next game the Player will need to achieve **21,000,000** to earn the Replay Award. If the Player does not achieve **21,000,000**, the next game reverts back to the original **7,000,000** or the new adjusted level maintained by the Fixed or Autopercentaging Feature.

06 SPECIAL AWARD: Set to **EXTRA BALL, CREDIT, TICKET***, **TOKEN*** or **POINTS**. Default is **CREDIT**. Select **EXTRA BALL** or **POINTS** if awarding a **CREDIT** or **TICKET/TOKEN** is prohibited in your area.

07 SPECIAL PERCENTAGE: Set between **1% - 5%**. Default is **2%**. This adjustment allows the operator to adjust how frequently the **Special Feature** is made available to the player.

08 FREE GAME LIMIT: Set between **01 - 09, NO FREE GAMES** or **UNLIMITED**. Default is **05**. Set the maximum number of Free Games that may be accumulated per game.

09 EXTRA BALL LIMIT: Set between **01 - 09, NO EXTRA BALLS** or **UNLIMITED**. Default is **09**. Set the number of Extra Balls that may be accumulated per game.

10 EXTRA BALL PERCENTAGE: Set between **01% - 50%**. Default is **25%**. This adjustment allows the operator to adjust how frequently the **Extra Ball Feature** is made available to the player.

11 GAME PRICING: There are two (2) methods available for Coin Switch Programming: **Standard & Custom**. Set between **USA 1** thru **EURO 12** or **CUSTOM**. **USA Factory Default Setting** is **USA 5**.

Sec. 3: Adjustments

The Dip Switch Settings (Sw. 300) on the CPU/Sound Board for each Country **must match** with what is shown in the **USA & Int'l. Standard Pricing Select Tables** for your country to have correct operation (see the next page). For a **Standard Selection (USA or International)**: Select & activate either of the "-" or "+" Mini-Icons to move backward or forward in the Display; With your choice appearing in the display, select & activate the ">>" Mini-Icon to advance and "lock-in" the change (display will momentarily flash **REQUEST INSTALLED**).

If **CUSTOM** is selected (appears in display), after selecting & activating any Mini-Icon (except for "-" or "+"), the display will momentarily flash **REQUEST INSTALLED** with the display "**LEFT COIN: 0 PULSE**" appearing. Use the "<<" or ">>" Mini-Icons to select the next choice (see Table Examples below) and the "-" or "+" Mini-Icons to customize the **PULSES, CREDITS & CLICKS** from 0 to 99.

The prescribed number of **PULSES** required for **1 CREDIT** must be set according to the **Pricing Scheme** desired. Some simple calculations are required to get the proper set-up. After customizing, **test** the set-up with appropriate Coins or Bills and adjust, if necessary. **Note:** Clicks can be changed if an optional Coin Meter is installed.

LEFT	CENTER	RIGHT	4TH	Example 1								LEFT	CENTER	RIGHT	FOURTH	ONE	BONUS	BONUS	BONUS	BONUS	LEFT	CENTER	RIGHT	FOURTH
COIN:	COIN:	COIN:	COIN:	PULSES	PULSES	PULSES	PULSE	PULSES	PULSES	PULSES	PULSES	CREDITS	CREDITS	CLICK	CLICKS	CLICK	CLICK							
25c	\$1.00	25c	Not Used	1 / 50c	2 / 75c	3 / \$1.00	3	12	3	1	4	0	0	0	0	1	4	1	1					
Coin Mechanisms Used				Pricing Scheme Desired																				

In **Example 1**, note the **LEFT (and RIGHT) COIN: 3 PULSES** and **ONE CREDIT: 4 PULSES**. Since every Coin inserted produces 3 Pulses & every Credit requires 4 Pulses, 2 Coins (50c) will produce 6 Pulses (4 Pulses for the 1st Credit + 2 Pulses remains in escrow). The 3rd Coin (75c) provides another 3 Pulses for a total of 5 Pulses (4 Pulses for the 2nd Credit + 1 Pulse remains in escrow). The 4th Coin (\$1.00) provides another 3 Pulses for a total of 4 Pulses (4 Pulses for the 3rd Credit + 0 Pulses remain). The **CENTER COIN: 12 PULSES** is set this way (with a Bill Validator attached); every \$1-Bill inserted produces 12 Pulses or 3 Credits.

LEFT	CENTER	RIGHT	4TH	Example 2								LEFT	CENTER	RIGHT	FOURTH	ONE	BONUS	BONUS	BONUS	BONUS	LEFT	CENTER	RIGHT	FOURTH
COIN:	COIN:	COIN:	COIN:	PULSES	PULSES	PULSES	PULSE	PULSES	PULSES	PULSES	PULSES	CREDIT	CREDITS	CLICK	CLICKS	CLICK	CLICK							
25c	\$1.00	25c	Not Used	1 / 50c	2 / 75c	7 / \$2.00	3	12	3	1	4	24	0	1	0	1	4	1	1					
Coin Mechanisms Used				Pricing Scheme Desired																				

In **Example 2**, similar to **Example 1**, however, **BONUS CREDITS** are implemented. In addition to receiving 3 plays for every \$1.00, the player is awarded an extra Credit for every 2nd dollar inserted before game start.

LEFT	CENTER	RIGHT	4TH	Example 3								LEFT	CENTER	RIGHT	FOURTH	ONE	BONUS	BONUS	BONUS	BONUS	LEFT	CENTER	RIGHT	FOURTH
COIN:	COIN:	COIN:	COIN:	PULSES	PULSES	PULSES	PULSE	PULSES	PULSES	PULSES	PULSES	CREDIT	CREDITS	CLICK	CLICKS	CLICK	CLICK							
25c	\$1.00	25c	Not Used	1 / 25c	6 / \$1.00	13 / \$2.00	5	20	5	0	4	20	40	1	0	1	4	1	1					
Coin Mechanisms Used				Pricing Scheme Desired																				

In **Example 3**, a **Pricing Scheme** for a cheaper game is shown. An extra Pulse is put in escrow for every 25c, thus at 4X 25c inserted, another Credit is given, and the **BONUS 1: 20 PULSES** threshold is also met, so 6 / \$1.00 is achieved. **BONUS 2: 40 PULSES** is set, so when this threshold is met with \$2.00, 13 Credits are produced.

LEFT	CENTER	RIGHT	4TH	Example 4								LEFT	CENTER	RIGHT	FOURTH	ONE	BONUS	BONUS	BONUS	BONUS	LEFT	CENTER	RIGHT	FOURTH
COIN:	COIN:	COIN:	COIN:	PULSE	PULSES	PULSES	PULSES	PULSES	PULSES	PULSES	PULSES	CREDITS	CREDITS	CLICK	CLICKS	CLICK	CLICK							
10p	50p	£1	20p	1 / 30p	2 / 50p	5 / £1	1	6	15	2	3	0	0	0	0	1	4	1	1					
Coin Mechanisms Used				Pricing Scheme Desired																				

In **Example 4**, a **Pricing Scheme** using a different currency (i.e. British Sterling) is shown to provide another way coins (or tokens) can be utilized to custom tailor to your own needs.

- 12 **MATCH AWARD:** Set to **CREDIT**, **TICKET*** or **TOKEN***. Default is **CREDIT**. *read note under Std. Adjustment 3.
- 13 **MATCH PERCENTAGE:** Set between **0%** - **10%** or **OFF**. Default is **9%**. At **0%** the match display occurs at the end of the game but never awards a Credit. Set to **OFF**, no **Match Animation Feature** is shown.
- 14 **BALLS PER GAME:** Set between **02** - **10**. Default is **03**. Set the number of balls per game.
- 15 **TILT WARNINGS:** Set to **00**, **01** or **03**. Default is **01**. Set the number of Plumb Bob Tilt Switch closures before the ball in play is tilted.
- 16 **CREDIT LIMIT:** Set between **04** - **50**. Default is **30**. Set the maximum credits allowed.
- 17 **ALLOW HIGH SCORES:** Set to **YES** or **NO**. Default is **YES**. When set to **YES** if a player exceeds any 1 of the 4 High Scores, the player may receive an award (depending on Standard Adjustment 03, **Replay Award**). Set to **NO** to disable this feature. There are 5 High Scores that will allow the player to enter their initials (or name) (see Standard Adjustment 29, **High Score Initials**).
- 18 **GRAND CHAMPION AWARDS:** Set between **00** - **05**. Default is **01**. Set the number of awards, awarded for exceeding Level 1 (the highest of the five (5) Levels).
- 19 **HIGH SCORE #1 AWARDS:** Set between **00** - **03**. Default is **01**. Set the number of awards, awarded for exceeding Level 2.
- 20 **HIGH SCORE #2 AWARDS:** Set between **00** - **02**. Default is **00**. Set the number of awards, awarded for exceeding Level 3.
- 21 **HIGH SCORE #3 AWARDS:** Set between **00** - **01**. Default is **00**. Set the number of awards, awarded for exceeding Level 4.
- 22 **HIGH SCORE #4 AWARDS:** Set between **00** - **01**. Default is **00**. Set the number of awards, awarded for exceeding Level 5.
- 23 **GRAND CHAMPION SCORE:** Set between **1,000,000** - **9,999,000,000** or **00** (increments of 1M). Default is 75,000,000. Set the desired **High Score Level** to which Level 1 may be achieved. A score higher than the default, cannot be reset by Standard Adjustment 28, **HSTD Reset Count**. The High Score will revert to the Default Score **ONLY** if a **Factory Reset** is done or the batteries are removed from the CPU/Snd. Bd.
- 24 **DEFAULT HIGH SCORE #1:** Set between **1,000,000** - **9,999,000,000** or **00** (increments of 1M). Default is 60,000,000. Set the desired **High Score Level** to which Level 2 may be achieved. Read Std. Adj. 28.
- 25 **DEFAULT HIGH SCORE #2:** Set between **1,000,000** - **9,999,000,000** or **00** (increments of 1M). Default is 50,000,000. Set the desired **High Score Level** to which Level 3 may be achieved. Read Std. Adj. 28.
- 26 **DEFAULT HIGH SCORE #3:** Set between **1,000,000** - **9,999,000,000** or **00** (increments of 1M). Default is 45,000,000. Set the desired **High Score Level** to which Level 4 may be achieved. Read Std. Adj. 28.
- 27 **DEFAULT HIGH SCORE #4:** Set between **1,000,000** - **9,999,000,000** or **00** (increments of 1M). Default is 40,000,000. Set the desired **High Score Level** to which Level 5 may be achieved. Read Std. Adj. 28.
- 28 **HSTD RESET COUNT:** Set between **100** - **9,900** or **OFF** (increments of 100). Default is **2,000**. **HSTD (High Score To Date)**. Set the number of games between "automatic resets of High Score Levels" to "Default Scores" for **ONLY** Standard Adj. 24-27, **Default High Score #1-#4**.
- 29 **HIGH SCORE INITIALS:** Set to **3 INITIALS** or **10 LETTER**. Default is **3 INITIALS**. When set to **3 INITIALS**, the player is allowed only 3 initials to input. When set to **10 LETTER NAME**, the player is allowed to enter 10 initials to input.
- 30 **FREE PLAY:** Set to **YES** or **NO**. Default is **NO**. When set to **YES**, no coins are required for **Game Play**.
- 31 **CUSTOM MESSAGE:** Set to **ON**, **CHANGE** or **OFF**. Default is **ON**. When set to **CHANGE**, a new message can be set or the old one can be edited (select the "+" Mini-Icon to change settings until "CHANGE" appears in the display, then select the ">>" Mini-Icon to access.). This adjustment can be accessed in two (2) ways by either selecting the "S.P.I." Icon and advancing to this Adjustment, or can be directly accessed by selecting the "ABCD CUST MSG" Icon in the **ADJUSTMENTS MENU**.

View the Custom Message Shortcut summary (end of this chapter) for how to enter text or symbols.

Standard Adjustments 32-48 continued on the next page.

Standard Adjustments Continued.

STANDARD ADJUSTMENT NAME: Definition

- 32 **FLASH LAMP POWER:** Set to **NORMAL**, **DIM** or **OFF**. Default is **NORMAL**. When set to **DIM**, the Flash Lamps impulse power is reduced by **25%** and when set to **OFF** the Flash Lamps will not flash.
- 33 **COIL PULSE POWER:** Set to **NORMAL**, **HARD** or **SOFT**. Default is **NORMAL**. When set to **HARD**, the coil pulse power is **increased** by **12.5%** of the normal pulse rate. When set to **SOFT** the coil pulse power is **decreased** by **12.5%** of the normal pulse rate. This adj. is provided to compensate for *Low Line* or *High Line voltage* conditions where the solenoids (coils) appear to *kicking too weak or too hard*. Adjust as required.
- 34 **KNOCKER VOLUME:** Set to **NORMAL**, **LOW** or **OFF**. Default is **NORMAL**. When set to **LOW**, the volume is decreased 50%. When set to **OFF**, no sound is heard when the "knocker" is sounded.
- 35 **GAME RESTART:** Set to **YES** or **NO**. Default is **YES**. When set to **YES**, a new game may be started during any ball after the first ball is completed (*if credits are available*). Pressing the **Start Button** during the first ball will add additional players. When set to **NO**, the game disables the **Start Button** after the first ball until the final ball is in play. *Review Sec. 2, Chp. 1, GAME OPERATIONS & FEATURES, for details.*
- 36 **BILL VALIDATOR:** Set to **YES** or **NO**. Default is **NO**. When set to **YES**, in *Game Attract Mode* the Display will show an *"Insert Bill Animation."* When set to **NO**, the Display will show an *"Insert Coin Animation."*
- 37 **BKGRND (BACKGROUND) MUSIC VOLUME:** Set between **01 - 15**. Default is **01**. After volume is set via Portals Service Buttons (*see Section 3, Chapter 1, PORTALS™ SERVICE MENU INTRODUCTION*) this adjustment can be utilized to adjust the background music (*1 all the way on, 15 all the way off*) while keeping the Special Sound FX the same level.
- 38 **FREEZE TIME (BALL SAVE):** Set to **OFF**, **0:01-0:15** or **AUTO**. Default is **OFF**. When set to **OFF** this feature is unavailable. Set between **0:01** through **0:15** (*single increments*) for the ball to be sent back into play if the time set is not met (*per ball*). Set to **AUTO** to automatically adjust the Freeze Timer based on the average ball time.
- 39 **////// UK ONLY //// Dip Switch Must Be Set //// UK POST SAVE ENABLED:** Set to **YES** or **NO**. Default is **NO**, (*UK Default is YES*). When set to **YES** this feature is available when lit. Set to **NO** to disable this feature. (*UK Games have Outlane/Center Post Save Devices which are accessed in differently; Non-UK Games cannot adjust this setting.*)
- 40 **TIMED PLUNGER:** Set to **OFF** or **0:15 - 1:00**. Default is **OFF**. When set to **0:15** to **1:00**, the plunger will "Autoplunge" the ball (*at the time set*) when the ball is at the beginning of play, awaiting the skill shot by the player.
- 41 **FLIPPER BALL LAUNCH:** Set to **DISABLED**, **LEFT FLIPPER**, **RIGHT FLIPPER**, **EITHER FLIPPER** or **BOTH FLIPPERS**. Default is **DISABLED**. This feature allows the player to operate the *Auto Ball Launch* with the **FLIPPER BUTTON(S)** depending on which setting is chosen.
- 42 **COINDOOR BALL SAVER:** Set to **YES** or **NO**. Default is **NO**. When set to **NO**, this feature is not available. When set to **YES**, this feature allows the **Coin Door** to be opened during game play; the ball will drain but the game will be placed "on hold". When the **Coin Door** is closed, the pinball will return to the Shooter Lane, and the game will resume.
- 43 **COMPETITION MODE:** Set to **YES** or **NO**. Default is **NO**. When set to **NO**, this feature is not available. If an **Install** of either **\$.50** or **Free Play Comp.** was made (*changing default to YES*), and was changed back to **NO**, the **COMPETITION MODE** will be turned **OFF** (*see Sec. 3, Chp. 5, GO TO INSTALLS MENU, \$. 50 or Free Play Competition*). Set to **YES**, this feature is available (*required for Competition Modes*); this feature will equalize random game features and global score values during multi-player games.
- 44 **CONSOLATION BALL:** Set to **YES** or **NO**. Default is **YES**. When set to **YES**, the **EXTRA BALL** (*Playfield Light Insert, location varies*) will be lit on the last ball in play, if certain programming criteria is met.
- 45 **FAST BOOT:** Set to **YES** or **NO**. Default is **YES**. When set to **NO** or if you hold the **RIGHT Flipper Button** during *Power-Up*, this feature is not available and will display all normal *Power-Up* screens. When set to **YES**, the game will not display the normal informative *Power-Up* screens, specifically the CPU Version screen and the Location/Game ID screen. Regardless of the setting, normal *Power-Up* safety checks are still performed.
- 46 **Q24 OPTION:** Set to **COIN METER**, **TOKEN DISPENSER** or **KNOCKER**. Default is **COIN METER**. This Coil (Solenoid) Location is left "open" at the Factory to allow for these optional Mechanisms to be added to the game. If selecting **TOKEN DISPENSER**, Standard Adjustments 03, 06 & 12 should be changed to **TOKEN**. *Call Technical Support at 1-800-542-5377 if more information is required on this option.*
- 47 **TICKET DISP. INSTALLED:** Set to **YES** or **NO**. Default is **NO**. *This adjustment is required only for games which have an optional Deltronics (DL-1275 PCB Style) Ticket Dispenser Installed. Unique CPU Sound Board Dip Switch (Sw. 300) Setting required, which also changes the Default to YES.*
- 48 **ALLOW PLAYER COMP. MODE:** Set to **YES** or **NO**. Default is **YES**. **Competition Mode** unrandomizes feature events, and standardizes game play and rule sets (*varies from game to game*) for fair competitions. With adequate credit, to enter **Competition Mode**, hold the **Flipper Button** in while pressing the **Start Button**. *Watch the Dot Display for more details (rules and operation are subject to change).* General rules are covered in the Instruction Card. Other *Hints* and/or *Rules* can be made known on this game either visually (*the Dot Display or Flashing Light Inserts*) or can be audible.

Standard Adjustments Continued.

STANDARD ADJUSTMENT NAME: Definition

- 49 **TECH ALERT WARNING:** A Portals™ Function. Review Sec. 3, Chp. 2, **GO TO DIAGNOSTICS MENU, Page 25, regarding Technician Alerts and its' functions.** Set to **NEVER, POWERUP, COIN DOOR** or **POWERUP AND COIN DOOR.** Default is **NEVER.** When set to **NEVER,** the Tech Report Alert display will not appear upon Power-Up or opening the Coin Door, if the game detects any problems. When set to **POWERUP,** the display will appear only upon Power-Up (if problems detected). When set to **COIN DOOR,** the display will appear only when the Coin Door is opened (if problems detected). When set to **POWERUP AND COIN DOOR,** the display will appear upon Power-Up and if the Coin Door is opened (if problems detected).
- 50 **TEAM SCORES:** Set to **YES** or **NO.** Default is **NO.** Set to **YES,** then Team Play will be made available. **Team Play only works in a 4-Player Game.** The totals for Players 1 / 3 (Team 1) & Players 2 / 4 (Team 2) are then displayed individually **as well as** the combined score for **BOTH TEAMS** to enable **Team Play (Doubles).** See Section 2, Chapter 1, **Game Operation & Features,** for non-adjustable Features.
- 51 **LOCATION ID:** Set between **00** to **9999.** Default is **00.** This adjustment allows the operator to assign a location identification number to the audit print-out sheet. *(Will not be affected by Factory Reset.)*
- 52 **GAME ID:** Set between **00** to **9999.** Default is **00.** This adjustment allows the operator to assign a game identification number to the audit print-out sheet. *(Will not be affected by Factory Reset.)*

Feature Adjustments (01-32)

To initiate, from the **ADJUSTMENTS MENU,** select the "LOTR" Icon with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. Select and *activate* either of the ">>" Mini-Icons to view the next or previous Adjustment in this group. Select and *activate* either of the "-" or "+" Mini-Icons to change the setting, if desired *(the Default Setting is noted in the definitions below).* The display will describe the **Adjustment Number, Adjustment Name** and the **Current Adjustment Setting.** The current Adjustment will remain in the display until the next Adjustment is view or when this Menu is exited. **Game Play, Rules, Settings and Explanation Subject to Change.**

Sec. 3: Adjustments

- | Nr. | FEATURE ADJUSTMENT NAME: Definition |
|-----|---|
| 01 | NUMBER RING COMBOS - (PER) LEVEL : Set between 05 - 15. Default is 10. Note: This adjustment controls how many combos until the difficulty and points increase. |
| 02 | TWO TOWERS MULTIBALL DIFFICULTY : Set to EXEASY, EASY, MODERATE, HARD or EXHARD. Default is MODERATE. Note: This adjustment controls how long we need to survive. |
| 03 | 1ST HARD THE TWO TOWERS MULTIBALL : Set between 01 - 03. Default is 1. Note: This adjustment determines which Multiball does the player need to light the locks for. |
| 04 | THE TWO TOWERS LOCK DIFFICULTY : Set to EXEASY, EASY, MODERATE, HARD or EXHARD. Default is EXEASY. Note: This adjustment controls how hard it is to light locks. EXTRA EASY = No Locks Lit, 2 KEEP Letters, Lane Memory and Locks Stackable. EASY = No Locks Lit, 1 KEEP Letter, Lane Memory and Locks Stackable. MODERATE = No Locks Lit, 1 KEEP Letter, Lane Memory and Locks Unstackable. HARD = No Locks Lit, 1 KEEP Letter, No Lane Memory and Locks Unstackable. EXTRA HARD = No Locks Lit, 1 KEEP Letter, Lanes Toggle and Locks Unstackable. |
| 05 | PALANTIR DIFFICULTY : Set to EASY, MODERATE, HARD or EXHARD. Default is EASY. Note: This adjustment controls how often the Palantir is lit. EASY = At Ball Start. MODERATE = At Game Start. HARD = Never. EXTRA HARD = Off at Ball Start. |
| 06 | FELLOWSHIP (OF THE RING) MBALL DIFF. : Set to EASY, MODERATE, HARD or EXHARD. Default is EASY. Note: This adjustment controls how many shots for each member. EASY = 1 shot. MODERATE = 1 shot (only 1 lit at a time, randomly). HARD = 2 shots. EXTRA HARD = 2 shots per member in-a-row. |
| 07 | RING MULTIBALL DIFFICULTY : Set to EASY, MODERATE or HARD. Default is MODERATE. Note: This adjustment controls how hard it is to get cool awards. |
| 08 | RING MULTIBALL EXTRA BALL MEMORY : Set to YES or NO. Default is NO. When set to YES, this feature bonus (Ring MB EB) lit will be retained in memory from ball-to-ball for the same player. When set to NO, this feature will go out at the end of each ball. |
| 09 | RING MULTIBALL SPECIAL MEMORY : Set to YES or NO. Default is NO. When set to YES, this feature bonus (Ring MB Special) lit will be retained in memory from ball-to-ball for the same player. When set to NO, this feature will go out at the end of each ball. |
| 10 | ELF GIFT EXTRA BALL MEMORY : Set to YES or NO. Default is YES. When set to YES, this feature bonus (Elf Gift EB) lit will be retained in memory from ball-to-ball for the same player. When set to NO, this feature will go out at the end of each ball. |
| 11 | ELF GIFT SPECIAL MEMORY : Set to YES or NO. Default is YES. When set to YES, this feature bonus (Elf Gift Special) lit will be retained in memory... (same definition as Feature Adjustment 09). |
| 12 | RING FRENZY EXTRA BALL DIFFICULTY : Set to EXEASY, EASY, MODERATE, HARD or EXHARD. Default is MODERATE. Note: This adjustment determines the multiplier needed. |
| 13 | RING FRENZY EXTRA BALL MEMORY : Set to YES or NO. Default is NO. When set to YES, this feature bonus (Ring Frenzy EB) lit will be retained in memory from ball-to-ball for the same player. When set to NO, this feature will go out at the end of each ball. |

Feature Adjustments 14-32 continued on the next page.

	FEATURE ADJUSTMENT NAME: Definition
14	RING MODE DIFFICULTY : Set to EASY , MODERATE , HARD or EXHARD . Default is EASY . <i>Note: This adjustment controls how often the Ring Mode is lit. EASY = Lit at Ball Start. MODERATE = Lit at Game Start, with Memory. HARD = Off at Game Start, with Memory. EXTRA HARD = Off at Ball Start.</i>
15	PATHS OF THE DEAD DIFFICULTY : Set to EXEASY , EASY , MODERATE , HARD or EXHARD . Default is MODERATE . <i>Note: This adjustment controls how Spots are lit. EXTRA EASY = 5 Spots Lit. EASY = 4 Spots Lit. MODERATE = 3 Spots Lit. HARD = 2 Spots Lit. EXTRA HARD = 1 Spot Lit.</i>
16	MYSTERY DIFFICULTY : Set to EASY , MODERATE , HARD or EXHARD . Default is HARD . <i>Note: This adjustment controls how often the Mystery Mode is lit. EASY = Lit at Ball Start. MODERATE = Lit at Game Start, with Memory. HARD = Off at Game Start, with Memory. EXTRA HARD = Off at Ball Start.</i>
17	MYSTERY EXTRA BALL MEMORY : Set to YES or NO . Default is NO . When set to YES , this feature bonus (<i>Mystery EB</i>) lit will be retained in memory from <i>ball-to-ball</i> for the same player. When set to NO , this feature will go out at the end of each ball.
18	MYSTERY SPECIAL MEMORY : Set to YES or NO . Default is NO . When set to YES , this feature bonus (<i>Mystery Special</i>) lit will be retained in memory from <i>ball-to-ball</i> for the same player. When set to NO , this feature will go out at the end of each ball.
19	SPOT RING (TARGET) DIFFICULTY : Set to EASY , MODERATE , HARD or EXHARD . Default is EASY . <i>Note: Controls when the spot ring target is lit: EASY = On at ball start. MODERATE = On at game start with memory. HARD = Off at game start with memory. EXTRA HARD = Off at ball start.</i>
20	ELF RING SPOTTING (DIFFICULTY) : Set to EXEASY , EASY , MODERATE or HARD . Default is MODERATE . <i>Note: Controls the number of cycles through the modes (i.e. a player has played all 6 modes) where shooting an unlit ring during normal play will spot an elf ring towards relighting the ring: EXTRA EASY = 3 cycles. EASY = 2 cycles. MODERATE = 1 cycle. HARD = Never.</i>
21	DWARF RING SPOTTING (DIFFICULTY) : Set to EXEASY , EASY , MODERATE or HARD . Default is EASY . <i>Note: Controls the number of mystery awards that can be collected where shooting an unlit mystery shot (Left VUK) will spot a dwarf ring towards relighting mystery: EXTRA EASY = 3 mysteries. EASY = 2 mysteries. MODERATE = 1 mystery. HARD = Never.</i>
22	HUMAN RING SPOTTING (DIFFICULTY) : Set to EXEASY , EASY , MODERATE or HARD . Default is MODERATE . <i>Note: Controls the number of Gollum Multiballs that can be collected where shooting an unlit Gollum Multiball shot (Right VUK) will spot a human ring towards lighting Gollum Multiball: EXTRA EASY = 3 Multiballs. EASY = 2 Multiballs. MODERATE = 1 Multiball. HARD = Never.</i>
23	FELLOWSHIP (OF THE RING) MULTIBALL DIFFICULTY : Set to EASY , MODERATE or HARD . Default is MODERATE . <i>Note: Controls which shots are lit to start Fellowship of the Ring Multiball: EASY = Left VUK / Orthanc / Top Saucer / Rt. VUK. MODERATE = Top Saucer / Rt. VUK. HARD = Top Saucer.</i>
24	RETURN OF THE KING MULTIBALL DIFFICULTY : Set to EASY , MODERATE or HARD . Default is MODERATE . <i>Note: Controls which shots are lit to start Return of the King Multiball: EASY = Lt VUK / Orthanc / Top Saucer / Rt VUK. MODERATE = Orthanc / Rt VUK. HARD = Orthanc.</i>
25	CONSOLATION MYSTERY : Set to YES or NO . Default is YES . <i>Note: Controls whether the game can light the mystery award for free on ball 3 if the player is having a poor game. If the game is set on competition mode, this adjustment will be treated as if set to No.</i>
26	ALLOW VOLUME EFFECTS : Set to YES or NO . Default is YES . Set to NO to disable this feature. Set to YES , the volume will automatically adjust louder and softer, depending on which feature (or certain events) is being played and/or how well the player is performing (or awards received). <i>Note: If the game volume is set to 0, this adjustment will be treated as if set to NO.</i>
27	GAME START BALROG ROAR : Set to YES or NO . Default is YES . Set to NO to disable this feature. <i>Note: This controls whether or not the Balrog roars as it closes at the start of a game.</i>
28	BARAD-DÛR DIFFICULTY : Set to EXEASY , EASY , MODERATE , HARD or EXHARD . Default is MODERATE . <i>Note: This controls how many shots are required for the initial award from Barad-dûr.</i>
29	BARAD-DÛR EXTRA BALL MEMORY : Set to YES or NO . Default is YES . Set to NO to disable this feature. When set to YES , this feature bonus (<i>Barad-dûr EB</i>) lit will be retained in memory from <i>ball-to-ball</i> for the same player. When set to NO , this feature will go out at the end of each ball.
30	SPOT FELLOWSHIP MEMBERS : Set to YES or NO . Default is YES . Set to NO to disable this feature. When set to YES , after a player's 1st ball, 1 Fellowship member will be spotted at each ball start until the Fellowship of the Ring Multiball is played.
31	GOLLUM'S CAVE DIFFICULTY : Set to EXEASY , EASY , MODERATE , HARD or EXHARD . Default is MODERATE . <i>Note: This controls how many shots are required for the initial award from Gollum's Cave.</i>
32	BARAD-DÛR EARLY CRASH : Set to YES or NO . Default is YES . Set to NO to disable this feature. <i>Note: This controls whether Barad-dûr can "fall over" other than winning "Destroy the Ring."</i>

 For further customization of Game Play Difficulty or Game Play Type or how to
RESET ONLY the Adjustments, see Section 3, Chapter 5, GO TO INSTALLS MENU.

Custom Message

To go directly to **Standard Adjustment 31, Custom Message**, from the **ADJUSTMENT MENU**, select the "CUST MSG" *Icon* with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. At the top left corner of the Display, the letter **A** is indicated (*blinking*) in the first available position (*Thirty-Six (36) characters including spaces are available*). Vary the letter(s) by operating the Left and Right Flipper Buttons (or "RED" or "GREEN" Buttons). With the desired letter indicated, depress the **Start Button** to lock in the letter and advance to the next character. Repeat this procedure until the desired message is completed in the display. Select the "<" or ">" characters to back-space (*erase*) and/or to move forward in an already typed message. After completion, press the "BLACK" Button, "REQUEST INSTALLED" is indicated and then exits this sub-menu.

Sec. 3: Adjustments

For further customization of Game Play Difficulty or Game Play Type or how to RESET ONLY the Adjustments, see Section 3, Chapter 5, GO TO INSTALLS MENU.

Go To Installs Menu

Overview

The Portals™ Service Menu System provides 14 Installs to vary Game Play (Feature Adjustments) Difficulty or Game Play Type and Install Factory (restores all adjustments to Factory Defaults).

Important: The Coin Door must be OPEN allowing the Memory Protect Switch to be disabled, so any Install changes can be made.

For detailed customization or to check current Adjustments Defaults (either changed by YOU in the Adjustments Menu or by this Installs Menu or for Factory Default Settings), see Section 3, Chapter 4, GO TO ADJUSTMENTS MENU. **Important:** Before preceding, write down any previously changed Adjustment Defaults. After completing one or more of the Installs in this Chapter, go back to the ADJUSTMENTS MENU to see which Standard and/or Feature Adjustments have changed (Feature Adjustments and/or settings are subject to change during production, and may differ than what is described in the tables at the end of this chapter). If the settings are not to your liking, perform one of the following:

- 1.: Manually change the Standard & Feature Adjustments Settings (perform task in the ADJUSTMENTS MENU, see Section 3, Chapter 4, GO TO ADJUSTMENTS MENU).
- 2.: Install Factory (see Page 49, end of this chapter) to reset all of the Standard & Feature Adjustments back to the Factory Default Settings.

Multiple Installs can be set to vary game play; however, for Installs that have one or more Adjustments in common, the last "Install" selected & activated, will supersede any previously changed Adjustment(s) from any prior Installs. Any adjustments which you changed and are not affected by the Install will remain as set.

For example, if you want a 5-BALL Game set to EXTRA EASY: Select and activate the "5BAL" Icon first (which will typically change any Feature Difficulty Adjustments to HARD), then select & activate the "X.EZ" Icon to change back the Difficulty Adjustments to EXTRA EASY. However, if the "X.EZ" Icon was selected & activated first, then the "5BAL" Icon was selected & activated, the game will be set to a 5-BALL Game set to HARD.

EXPLANATION & USAGE OF COMMON LARGE ICONS USED IN THIS MENU:

These non-selectable icons appear in the selected Menu only when there are MORE Icons to the LEFT or to the RIGHT available for selection.

Select and activate to return to the PREVIOUS Menu.

Select and activate to QUIT, exits & returns to the Attract Mode.

Select and activate to view HELP Screens of the current Menu*.

* Help Note: An explanation of each Icon at that menu level will cycle continuously. To exit a display where no Icons are available for selection, pressing any button will exit the display.

GO TO INSTALLS MENU

After entering Portals™, the MAIN MENU now appears. Select the "INST" Icon in the MAIN MENU with either the Red "LEFT" or Green "RIGHT" Buttons (the Flipper Buttons operates in the same manner) and press the Black "ENTER" Button (the Start Button operates in the same manner). The INSTALLS MENU appears. Continue through this chapter for the explanation & usage of the Icons in the INSTALLS MENU.

View Pages 49 & 50 for an Overview of the Standard & Feature Adjustment(s) which have changed upon selection.

Install Extra Easy

To initiate, from the INSTALLS MENU, select the "X.EZ" Icon with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. Game Play Difficulty is set to EXTRA EASY. "REQUEST INSTALLED" is indicated and returns to the INSTALLS MENU with the "X.EZ" Icon flashing.

Install Easy

To initiate, from the INSTALLS MENU, select the "EASY" Icon with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. Game Play Difficulty is set to EASY. "REQUEST INSTALLED" is indicated and returns to the INSTALLS MENU with the "EASY" Icon flashing.

Install Normal

To initiate, from the **INSTALLS MENU**, select the "FACT" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Difficulty** is reset to **Factory Default Settings**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "FACT" *Icon* flashing.

Install Hard

To initiate, from the **INSTALLS MENU**, select the "HARD" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Difficulty** is set to **HARD**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "HARD" *Icon* flashing.

Install Extra Hard

To initiate, from the **INSTALLS MENU**, select the "X.HD" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Difficulty** is set to **EX. HARD**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "X.HD" *Icon* flashing.

Install 3-Ball

To initiate, from the **INSTALLS MENU**, select the "3BAL" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Type** is set to **3-BALL PLAY**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "3BAL" *Icon* flashing.

Install 5-Ball

To initiate, from the **INSTALLS MENU**, select the "5BAL" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Type** is set to **5-BALL PLAY**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "5BAL" *Icon* flashing.

\$.50 Competition (a.k.a. IFPA)

To initiate, from the **INSTALLS MENU**, select the "PAY" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Type** is set to **TOURNAMENT PAY MODE**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "PAY" *Icon* flashing.

Free Play Competition (a.k.a. EXPO or PAPA)

To initiate, from the **INSTALLS MENU**, select the "FREE" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Type** is set to **TOURNAMENT FREE MODE**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "FREE" *Icon* flashing.

Install Home Play

To initiate, from the **INSTALLS MENU**, select the "HOME" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Type** is set to **NORMAL HOME PLAY**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "HOME" *Icon* flashing.

Film Star Reset

To initiate, from the **INSTALLS MENU**, select the "STAR" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Type** is set to **EASY HOME PLAY**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "STAR" *Icon* flashing.

Install Novelty

This setting is recommended where *local laws restrict certain game features*.

To initiate, from the **INSTALLS MENU**, select the "NOV" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. **Game Play Type** is set to **RESTRICTED PLAY**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "NOV" *Icon* flashing.

Sec. 3: Go To Installs

View **below & next** page for an Overview of the Std. & Feature Adjustment(s) which have changed upon selection.

Install Add-A-Ball

This setting is recommended where **local laws restrict certain game features.**

To initiate, from the **INSTALLS MENU**, select the "A.A.B" *Icon* with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. Game Play Type is set to **RESTRICTED PLAY**. "REQUEST INSTALLED" is indicated and returns to the **INSTALLS MENU** with the "A.A.B" *Icon* flashing.

Install Factory (ONLY affects all Adjustments/Installs)

To initiate, from the **INSTALLS MENU**, select the "FACT" *Icon* with either the Red "LEFT" or Green "RIGHT" Buttons and press the Black "ENTER" Button. **▲** All Standard & Feature Adjustments which were changed in the **INSTALLS** or **ADJUSTMENTS MENU** are returned to the **Factory Defaults**.

Overview of Standard Adjustment Changes upon selection of an Install:

ONLY THE STANDARD ADJUSTMENTS LISTED ARE AFFECTED AS NOTED IN THE TABLES BELOW.

Sec. 3: Go To Installs

ONLY THE FEATURE ADJUSTMENTS LISTED ARE AFFECTED AS NOTED IN THE TABLES BELOW.

Nr.	FEATURE ADJUSTMENT NAME	\$.50 COMPETITION *	FREE PLAY COMP. *	INSTALL HOME PLAY	FILM STAR RESET	INSTALL NOVELTY	INSTALL ADD-A-BALL	INSTALL FACTORY
01-26	See Table above for listing of Feature Adjustments which change with Install.	No Change	No Change	No Change	SEE TABLE ABOVE	No Change	No Change	CAUTION! : Upon selection of Install Factory ("FACT" Icon),

all Standard & Feature Adjustments which were changed in the INSTALLS or ADJUSTMENTS MENU are returned to the **Factory Defaults** (see the Adjustment Tables on Page 38 for details).

For how to RESET Audits (also can RESET High Scores, Credits or Reset All Adjustments), see Section 3, Chapter 6, GO TO RESET MENU.

Go To Reset Menu

Overview

The Portals™ Service Menu System provides five (5) functions to reset **Coin & Game Audits, High Scores, Credits** or to reset **ALL AUDITS, ADJUSTMENTS & INSTALLS** back to the **Factory Default Settings**.

Important: The **Coin Door** must be **OPEN** allowing the **Memory Protect Switch** to be disabled, so any **Reset** changes can be made.

EXPLANATION & USAGE OF COMMON LARGE ICONS USED IN THIS MENU:

These **non-selectable** icons appear in the selected Menu only when there are **MORE** icons to the **LEFT** or to the **RIGHT** available for selection.

Select and activate to return to the **PREVIOUS** Menu.

Select and activate to **QUIT**, exits & returns to the **Attract Mode**.

Select and activate to view **HELP** Screens of the current Menu*.

⚠ WARNING: ⚠

As soon as any **Reset Icon** is selected & activated, the information associated with the **Reset Icon**, is lost!

* **Help Note:** An explanation of each **Icon** at that menu level will cycle continuously. To exit a display where no **Icons** are available for selection, pressing any button will exit the display.

GO TO RESET MENU

After entering **Portals™**, the **MAIN MENU** now appears. Select the **"RESET"** Icon in the **MAIN MENU** with either the **Red "LEFT"** or **Green "RIGHT"** Buttons (the **Flipper Buttons** operates in the same manner) and press the **Black "ENTER"** Button (the **Start Button** operates in the same manner). The **RESET MENU** appears. Continue below for the explanation & usage of the **Icons** in the **RESET MENU**.

Reset Coin Audits

To initiate, from the **RESET MENU**, select the **"COIN"** Icon with either the **Red** or **Green Buttons** and press the **Black Button**. ⚠ **ONLY** the **Coin Audits (05-13)** will be reset to zero (0), **Factory Default Settings**. **"REQUEST INSTALLED"** is indicated and returns to the **RESET MENU** with the **"COIN"** Icon flashing.

Reset Game Audits

To initiate, from the **RESET MENU**, select the **"AUD"** Icon with either the **Red** or **Green Buttons** and press the **Black Button**. ⚠ **ONLY** the **Game Audits (01-04) & Standard Audits (01-67)** will be reset to zero (0), **Factory Default Settings**. **Note: Coin Audits (05-13) & Software Meter Audit (14) will not be reset.** **"REQUEST INSTALLED"** is indicated and returns to the **RESET MENU** with the **"AUD"** Icon flashing.

Reset High Scores

To initiate, from the **RESET MENU**, select the **"HSTD"** Icon with either the **Red** or **Green Buttons** and press the **Black Button**. ⚠ **ONLY** the **High Scores** will be reset to the current values. **Note: If these five (5) adjustments were not personally changed by you, the Factory Default Settings will be used (see Section 3, Chapter 4, GO TO ADJUSTMENTS MENU, Standard Adjustments 18-22).** **"REQUEST INSTALLED"** is indicated and returns to the **RESET MENU** with the **"HSTD"** Icon flashing.

Reset Credits

To initiate, from the **RESET MENU**, select the **"CRED"** Icon with either the **Red** or **Green Buttons** and press the **Black Button**. ⚠ **All Credits** will be reset to zero (0), **Factory Default Settings**. **"REQUEST INSTALLED"** is indicated and returns to the **RESET MENU** with the **"CRED"** Icon flashing.

Factory Reset

To initiate, from the **RESET MENU**, select the **"FACT"** Icon with either the **Red** or **Green Buttons** and press the **Black Button**. ⚠ **All Audits (except for Audit 14, Software Meter), all Adjustments and Installs** will be reset to the **Factory Default Settings**. **Note: To RESET ONLY the ADJUSTMENTS & INSTALLS (leaving all the Audits alone), see Section 3, Chapter 5, GO TO INSTALLS MENU, Install Factory.** **"REQUEST INSTALLED"** is indicated and the **Service Menu** is exited, returning to the **Attract Mode**.

Go To
Reset Menu

Sec. 3: Go To Reset

Example:

After entering Portals™, the MAIN MENU now appears. Use the Red "LEFT" or Green "RIGHT" Buttons to select the "RESET" Icon (GO TO RESET MENU).

Press the Black "ENTER" Button to activate this ICON. The RESET MENU now appears with the "COIN" Icon (RESET COIN AUDITS) flashing:

From the RESET MENU, select any of the Icons ("COIN", "AUD", "HSTD", "CRED") with either the Red or Green Buttons and press the Black Button to activate the ICON chosen. After the ICON is selected & activated, "REQUEST INSTALLED" is indicated and is returned to the RESET MENU with the previously selected Icon flashing.

Important:

AT THIS TIME, **DO NOT** PRESS THE START BUTTON OR BLACK BUTTON AFTER SELECTING ANY OF THE FIVE (5) ICONS UNLESS THIS IS WHAT IS DESIRED. **THE INFORMATION ASSOCIATED WITH THE RESET ICON WILL BE LOST!** PLEASE READ THE PREVIOUS PAGE FOR EXACTLY WHAT WILL HAPPEN IF ANY OF THESE FIVE (5) ICONS ARE SELECTED & ACTIVATED.

Before performing any RESET, write down your last Audit Totals (see Section 3, Chapter 3, GO TO AUDITS MENU) and any personalized Adjustment changes you may have made (see Section 3, Chapter 4, GO TO ADJUSTMENTS MENU).

If the "FACT" Icon is select and activated, "REQUEST INSTALLED" is indicated and the Service Menu is exited, returning to the Attract Mode. See the previous page for explanation & usage of the Icons in the RESET MENU.

Go To Tournament Menu

Overview

The Portals™ Service Menu System provides 6 Steps necessary to SET-UP, START, MONITOR and END Pinball Tournaments on your *Tournament Pinball System Ready Pinball Game*. **OPTIONAL EQUIPMENT & HARDWARE (SOLD SEPARATELY) ARE REQUIRED FOR PROPER OPERATION AND USE OF THIS MENU.**

Game code may get upgraded during production; compare all Tournament Adjustments & Audits in the display with the manual and make any corrections to the Tournament Adjustments and/or Audits Tables (*next page*), as necessary. Tournament Adjustments & Audits are subject to change (*with or without notice*). To view Tournament Adjustments & Audits in the display, enter the **Portals™ Service Menu System**. When any change is made and then the next / previous item is selected (*or the Sub-Menu is exited*), the display will momentarily flash **REQUEST INSTALLED**. For details on *Earnings, Standard & Feature Audits*, see Section 3, Chapter 3, **GO TO AUDITS MENU**. For details on *Standard & Feature Adjustments*, see Section 3, Chapter 4, **GO TO ADJUSTMENTS MENU**.

For more details on the equipment & hardware required, Installation and Set-up, read the **ToPS™ Tournament Pinball System Kit Installation Manual (SPI Part Number: 780-6011-00)** provided in the **Optional Tournament Kit (SPI Part Number: 502-5011-00)**, not included with this *ToPS™ Ready Pinball Game*.

The equipment & hardware consists of: **BETA**rite™ **Electronic 7 X 80 Multi-Color Dot Display** (*secured above the Backbox*), **Tournament Serial Interface (TSI) Board** (*secured in the Backbox*), **Tournament Button + Lamp** (*secured onto the Front Molding*) and all necessary wiring, hardware and documentation (*which also provides suggestions and Tips for ToPS™*).

To order, contact your local Distributor (*view Pages DR. 3 & 9 in the Find-It-In-Front: Dr. Pinball*). You can also call Technical Support or visit our website (*details on the back cover of this manual*).

Important: The Coin Door must be OPEN allowing the Memory Protect Switch to be disabled, so any Tournament changes can be made.

EXPLANATION & USAGE OF COMMON LARGE & MINI-ICONS USED IN VARIOUS MENUS & SUB-MENUS:

These non-selectable icons appear in the selected menu only when there are MORE icons to the LEFT or to the RIGHT available for selection.

Select and activate to return to the PREVIOUS Menu.

Select and activate to QUIT, exits & returns to the Attract Mode.

Select and activate to view HELP Screens of the current Menu*.

Select and activate to:
 Move LEFT or RIGHT, select previous / next or move backwards / forwards.
 DECREMENT (-) or INCREMENT (+) displayed value or select previous / next.

* Help Note: An explanation of each Mini-Icon at that menu level will cycle continuously. To exit a display where no Mini-Icons are available for selection, pressing any button will exit the display.

GO TO TOURNAMENT MENU (OPTIONAL USE ONLY)

After entering Portals™, the MAIN MENU now appears. Select the "TOUR" icon in the MAIN MENU with either the Red "LEFT" or Green "RIGHT" Buttons (the Flipper Buttons operates in the same manner) and press the Black "ENTER" Button (the Start Button operates in the same manner). The TOURNAMENT MENU appears. Continue through this chapter for the explanation & usage of the Icons in the TOURNAMENT MENU.

Go To
Tournament Menu

Tournament Adjustments (01-10)

To initiate, from the **TOURNAMENT MENU**, select the "SET UP" *Icon* with either the Red "LEFT" or Green "RIGHT" **Buttons** and press the Black "ENTER" **Button**. Select and *activate* either of the ">>" *Mini-Icons* to view the next or previous Tournament Adjustment in this group. Select and *activate* either of the "-" or "+" *Mini-Icons* to change the setting, if desired (*the Default Setting is noted in the definitions below*). The display will describe the **Tournament Adjustment Number**, **Tournament Adjustment Name** and the **Current Tournament Adjustment Setting**. The current Tournament Adjustment will remain in the display until the next Tournament Adjustment is viewed or when this Menu is exited.

IMPORTANT FOR TOURNAMENT USERS: *Select the settings carefully. For Tips for ToPS™ (different Tournament Sample Set-Ups, etc.), view the ToPS™ Tournament Pinball System Kit Installation Manual (SPI Part Number: 780-6011-00) provided in the Optional Tournament Kit (SPI Part Number: 502-5011-00). Before allowing players to begin after you've started a Tournament, double-check the Normal Mono-Color Dot Display and Top Multi-Color Dot (Beta Brite®) Display to ensure everything you want is displayed correctly. Once a Tournament is started, no adjustments can be made until you end the Tournament (by selecting the "END" Icon). Allowing players to qualify, then ending a Tournament prematurely to make corrections will affect the outcome of the Tournament. View the ToPS™ Manual for more details.*

WARNING: Changes made in any Adjustments will be lost after a FACTORY RESET or removal of the CPU/Sound Board Batteries.

Nr.	TOURNAMENT ADJUSTMENT NAME: Definition
01	CREDITS PER PLAY: Set between 01 - 10. Default is 02. Set the maximum number of <i>Credits</i> that may be accumulated per game.
02	JACKPOT BASE: Set between \$00.00 - \$999,999.00 (<i>increments of \$1</i>). Default is \$20.00. Set the initial <i>Prize Pool Amount</i> to be offered for the Tournament. Note: <i>The displays will present the words "PRIZE POOL" in lieu of the word "JACKPOT".</i>
03	JACKPOT INCREMENT: Set between \$00.00 - \$999,999.99 (<i>increments of 1¢</i>). Default is \$00.50. Set the <i>Prize Pool Increment</i> which will increase the <i>Prize Pool Amount</i> with each Tournament Game played.
04	JACKPOT MAX.: Set between \$00.00 - \$999,999.00 (<i>increments of \$1</i>). Default is \$2,500.00. Set the maximum cap to be placed on the <i>Prize Pool</i> during a Tournament. Note: <i>The displays will present the words "PRIZE POOL" in lieu of "JACKPOT".</i>
05	CURRENT DATE/TIME: Set the current date and time. After setting the Start and End Dates in Tournament Adjustments 6 & 7, the Tournament will then start automatically*. <i>*Requires the TIMEKEEPER™ IC (included in the kit) installed in Location U212 on the CPU/Sound Board.</i>
06	START DATE: Set between JANUARY through DECEMBER. Default is JANUARY. After the month desired is set, a valid day must be set. To Start a Tournament , go back to the TOURNAMENT MENU and select the "STRT" <i>Icon</i> (<i>see the next page</i>).
07	END DATE: Set between JANUARY through DECEMBER. Default is FEBRUARY. After the month desired is set, a valid day must be set. To End a Tournament , go back to the TOURNAMENT MENU and select the "END" <i>Icon</i> (<i>see the next page</i>).
#	OF PRIZES: Set between 01 - 05. Default is 03. Set the maximum number of <i>Prize Positions</i> to be awarded during a Tournament. Selections (<i>cannot be changed</i>) are as follows: Set to 01, the Tournament Winner is awarded 100% of the Prize Pool. Set to 02, the 1st & 2nd place winners are awarded 70% / 30%, respectively. Set to 03, the 1st, 2nd & 3rd place winners are awarded 50% / 30% / 20%, respectively. Set to 04, the 1st, 2nd, 3rd & 4th place winners are awarded 50% / 25% / 15% / 10%, respectively. Set to 05, the 1st, 2nd, 3rd, 4th & 5th place winners are awarded 50% / 20% / 15% / 10% / 5%, respectively.
	AWARD TYPE: Set to CASH, POINTS, TICKET, NONE or PRIZE. Default is CASH. <i>This adjustment determines how the Prize Pool is to be represented in the Attract Mode on both the Normal and top Beta-Brite® Displays.</i>
09	Select CASH for the displays to represent the Prize Pool amount (<i>based on Jackpot Base and Max.</i>) in \$Dollars . Select POINTS for the displays to represent the Prize Pool amount in Points . Select TICKET for the display to represent the Prize Pool amount in Tickets . Select NONE NOT TO represent the Prize Pool amount (<i>if prize(s) to be awarded are not Cash, Points or Tickets</i>). Select PRIZE , if applicable.
10	SHOW PLAYER'S CASH: Set to YES or NO. Default is YES. When set to YES, both the Beta-Brite® Multi-Color Dot Display and the Normal Mono-Color Display exhibit the Cash amount in the Attract Mode .

Go To
Tournament Menu

Start Tournament (select only after Set-Up is completed)

To initiate, from the **TOURNAMENT MENU**, select the "STRT" *Icon* with either the Red "LEFT" or Green "RIGHT" **Buttons** and press the Black "ENTER" **Button**. The "START TOURNAMENT?" **MENU** appears with the "NO" *Mini-Icon* flashing.

If **Set-Up (Tournament Adjustments)** was not completed **OR** the **Tournament Audits** were not recorded from the prior Tournament, exit this Menu by activating the "NO" *Mini-Icon*. If **Set-Up** was completed and the **Tournament Audits** were recorded, select and activate the "YES" *Mini-Icon*. The Pinball Game is set to **Tournament Ready Mode** (the **Flashing Tournament Button** must be depressed for a Tournament Game after the proper credit is inserted). "REQUEST INSTALLED" is indicated and returns to the **TOURNAMENT MENU** with the "STRT" *Icon* flashing. **Note:** If the "STRT" *Icon* appears to be non-functioning, it is because a Tournament is in progress. The Tournament must first be stopped (select and activate the "END" *Icon* in the **TOURNAMENT MENU**).

Stop Tournament (select only after a Tournament is started)

To initiate, from the **TOURNAMENT MENU**, select the "END" *Icon* with either the Red "LEFT" or Green "RIGHT" **Buttons** and press the Black "ENTER" **Button**. The "END TOURNAMENT?" **MENU** appears with the "NO" *Mini-Icon* flashing. If the

Tournament was not completed, exit this Menu by activating the "NO" *Mini-Icon*. If the **Tournament** was completed (the **End Date** set has passed), select and activate the "YES" *Mini-Icon*. The Pinball Game is taken out of **Tournament Ready Mode** (to readjust any **Tournament Adjustments**, the **Tournament** must be "stopped"). "REQUEST INSTALLED" is indicated and returns to the **TOURNAMENT MENU** with the "END" *Icon* flashing. **Record your Tournament Audits at this time as they will be reset (except for the "Accumulative Audits") if another Tournament is started!**

Sec. 3: Tournament ...

Tournament Prizes

To initiate, from the **TOURNAMENT MENU**, select the "PRIZ" *Icon* with either the Red "LEFT" or Green "RIGHT" **Buttons** and press the Black "ENTER" **Button**. Select and activate either of the ">>" *Mini-Icons* to view the next or previous Leader in this group. The display will describe the **Leader Placement (1st, 2nd, 3rd, 4th & 5th)**, **Leader Name**, **4-Digit Pin-Code**, and **Prize Pool** portion for the **Current and Previous Tournaments**. The current Leader (and related information) will remain in the display until the next Leader is chosen or when the Sub-Menu is exited.

Tournament Audits (01-12)

To initiate, from the **TOURNAMENT MENU**, select the "AUD" *Icon* with either the Red "LEFT" or Green "RIGHT" **Buttons** and press the Black "ENTER" **Button**. Select and activate either of the ">>" *Mini-Icons* to view the next or previous Tournament Audit in this group. The display will describe the **Tournament Audit Number**, **Tournament Audit Name** and the **Current Tournament Audit Total** (Value). The current Tournament Audit will remain in the display until the next Tournament Audit is viewed or when this Menu is exited.

IMPORTANT FOR TOURNAMENT USERS: >>>> **A L L** of the **Tournament Audits 01-12** are **RESET O N L Y** if a **Factory Reset** is done (see **Section 3, Chapter 6, GO TO RESET MENU**). >>>> **Tournament Audits 01-06** are **RESET ONLY** if a **new Tournament** is started. >>>> **Tournament Audits 07-12** are **NOT RESET***, they're **accumulative** (totals accumulate since the first **Tournament** was played). *if no **Factory Reset** is done.

Nr.	TOURNAMENT AUDIT NAME: Definition
01	TOTAL PLAYS: Provides the total number of <i>Regular</i> and <i>Tournament Games</i> played while a <i>Tournament</i> is active (in progress). This total is derived by adding Tournament Audit 02, TOURNAMENT PLAYS , with Regular Plays .
02	TOURNAMENT PLAYS: Provides the total number of <i>Tournament Games</i> played while a <i>Tournament</i> is active (in progress).
03	TOTAL GAME EARNINGS: Provides the total Gross Earnings accepted , while a <i>Tournament</i> is active (in progress).
04	TOTAL TOUR. EARNINGS: Provides the total Tournament Earnings (Audit 03 less Regular Game Earnings) while a <i>Tournament</i> is active (in progress).
05	JACKPOT (PRIZE POOL TOTAL): Provides the total Prize Pool (Jackpot) Amount to be paid out while a <i>Tournament</i> is active (in progress).
06	NET EARNINGS: Provides the total Net Earnings (Gross Earnings less Prize Pool) while a <i>Tournament</i> is active (in progress).

Tournament Audits 07-12 continued on the next page.

Tournament Audits Continued.

TOURNAMENT AUDIT NAME: Definition

The following Tournament Audits WILL NOT BE RESET if a new Tournament is started. ALL AUDITS can be reset if a Factory Reset is done!

- 07 **ACCUM. TOTAL PLAYS:** Provides the accumulative total amount of *Regular & Tournament Games* played since the first Tournament was played.
- 08 **ACCUM. TOUR. PLAYS:** Provides the accumulative total amount of *Tournament Games* played since the first Tournament was played.
- 09 **ACCUM. EARNINGS:** Provides the total Gross Earnings *accepted*, since the first Tournament was played.
- 10 **ACCUM. TOUR EARNINGS:** Provides the accumulative total Tournament Game Earnings since the first Tournament was played.
- 11 **ACCUM. JACKPOT:** Provides the accumulative total of Prize Pool (*Jackpot*) Amounts paid out since the first Tournament was played.
- 12 **# TOURNAMENTS:** Provides the number of Tournaments (*not individual Tournament Games*) since the first Tournament was played.

Sign Messages A-B (Tournie Adj. 11-12)

To initiate, from the **TOURNAMENT MENU**, select the "A-B TEXT" *Icon* with either the **Red "LEFT"** or **Green "RIGHT"** Buttons and press the **Black "ENTER"** Button. Select and *activate* either of the ">>" *Mini-Icons* to view the next or previous Tournament Adjustment in this group. Select and *activate* either of the "-" or "+" *Mini-Icons* to change the setting, if desired (*the Default Setting is noted in the definitions below*). The display will describe the **Tournament Adjustment Number**, **Tournament Adjustment Name** and the **Current Tournament Adjustment Setting**. The current Tournament Adjustment will remain in the display until the next Tournament Adjustment is viewed or when this Menu is exited.

Nr.

TOURNAMENT ADJUSTMENT NAME: Definition

- 11 **LOCATION MESSAGE:** Set to **ON**, **CHANGE** or **OFF**. Default is **ON**.
When set to **CHANGE**, a new message can be set or the old one can be edited (*select the "+" Mini-Icon to change settings until "CHANGE" appears in the display, then select the ">>" Mini-Icon to access.*). At the top left corner of the Display, the letter **A** is indicated (*blinking*) in the first available position. Vary the letter(s) by operating the Left and Right Flipper Buttons (*or "RED" or "GREEN" Buttons*). With the desired letter indicated, depress the **Start Button** to lock in the letter and advance to the next character. Repeat this procedure until the desired message is completed in the display. Select the "<" or ">" characters to back-space (*erase*) and/or to move forward in an already typed message. After completion, press the **"BLACK" Button**, **"REQUEST INSTALLED"** is indicated and then exits this sub-menu.
- 12 **PRIZE MESSAGE:** Set to **ON**, **CHANGE** or **OFF**. Default is **ON**.
Procedure identical to Tournament Adjustment 11, Location Message.

The **DEFAULT LOCATION MESSAGE** is:

STERN PINBALL PROUDLY PRESENTS...

The **DEFAULT PRIZE MESSAGE** is:

YOU CAN BE THE NEXT BIG WINNER!

IMPORTANT FOR TOURNAMENT USERS:
*2 additional messages can be added by using the Beta Brite® Remote. More details in the ToPS™ Tournament Pinball System Kit Installation Manual (SPI Part Number: 780-6011-00) provided in the **Optional Tournament Kit** (SPI Part Number: 502-5011-00).*

Printed Circuit Boards (PCBs)

CPU/Sound Board II (with ATMEL Processor) Theory of Operation

CPU Section:

The CPU is a 68B09E (U209) with up to 8 MBytes of CPU Code Space (U210). The CPU code is bank selected by the use of U211 and each bank consists of 16 KBytes. 8 KBytes of RAM (U212) is available to the CPU. The RAM is battery backed and has a write protected area. Battery back up is accomplished by 3-AA Cells (BAT1) Battery Pack which has a TEST POINT (TP): VBATT to check the battery voltage status. The write protected area consists of 512 Bytes used for storing game settings. This section of RAM can only be written to when the coin door is open. The Coin Door switch comes into the CPU on CN6-12 and is fed into the address decoding PAL U213. When this memory protect signal is low writes to the protected RAM area are prohibited. Address decoding for the system is accomplished by one PAL U213 and one 1-of-8 decoder U214.

A watchdog is used to monitor the CPU and the 5v supply. If the 5v supply is below 4.75 the watchdog will hold the CPU/Sound Board & I/O Board in reset. The watchdog must be fed at a rate of 250ms or faster. The signal used to feed the watchdog comes from the EPROM Bank select signal used to load U211.

The I/O Interface CN1 is buffered by two (2) HC245 Chips (U207 & U208). The CPU's reset line is buffered by Q10 and fed over to the I/O through CN1. An I/O Strobe Signal is fed through CN1-15 and is used to notify the I/O that a valid address is being sent.

Switches:

The Switch Matrix consists of eight (8) 2N3904 Transistors (Q1-Q8) which pull one of 8 strobes 'low' to activate a Single Column of switches. The Switch Return Signals are fed into CN7 [SWITCH ROWS] and are highly filtered and compared to a 2.5v reference voltage. The Switch Return Voltage must be below 2.5v to make a Valid Switch Closure. If false switches are appearing, check that none of the 2N3904 Transistors are permanently pulling the strobe line low. Only one strobe from CN5 [SWITCH COLUMNS] should be low at any time. CN6 [DEDICATED SWITCH IN] is a Dedicated Bank of Input Switches. Switches connected to CN6 are connected to ground instead of a strobe and may be read at any time.

Plasma Interface:

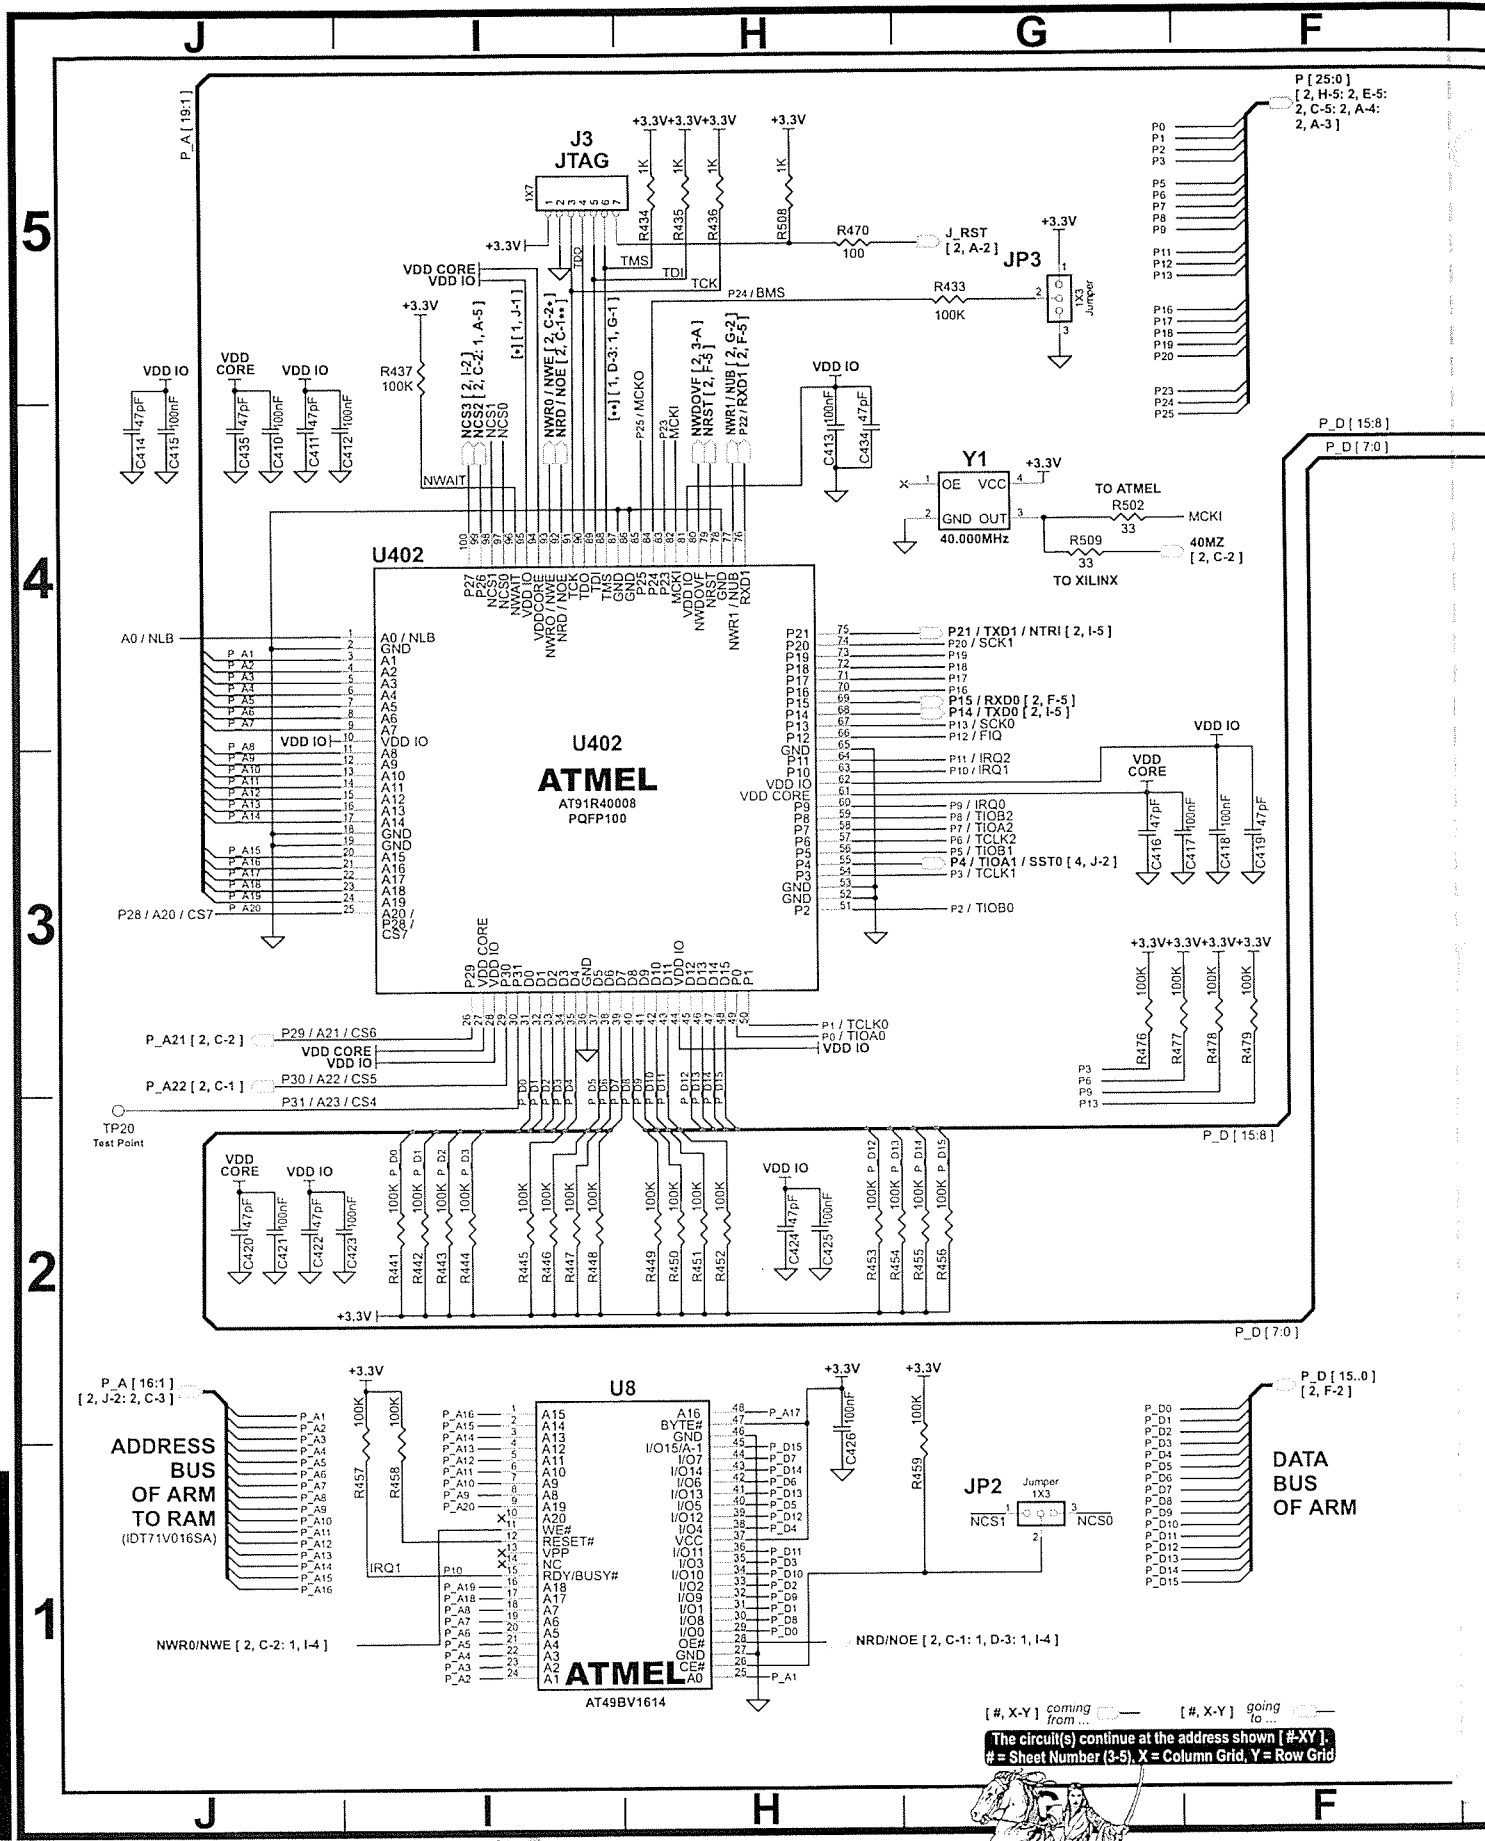

The data path for communication to and from the Plasma Controller Board is 8 bits wide. There are separate Input and Output Busses. Data going out to the controller comes from the CPU's Data Bus through U201 and onto CN8-Pins 11-18. Status back from the Plasma Controller comes in on CN8-Pins 22-26 and is fed into U202 for input to the CPU's Data Bus. Two control signals that go out to the Plasma Controller are PRES [TP17: PLASMA RESET] and CN8-Pin 19 [PSTB - Plasma Strobe]. The Plasma Reset is software controllable through U216/B and also has a test point "Plasma Reset". The Plasma Strobe Signal to the controller is generated from U216/A and is used to latch data into the Plasma Controller.

Other Test Points (TP):

TP 7: E & TP5: Q - The CPU signals for both 68B09E processors. Should be at 2Mhz with Q leading E by 500 nsec. TP2: P0. TP3: P1. TP4: P2. TP20: (near U402). TP8: (near U219). TP1: +3.3V.

GLOSSARY OF TERMS

- A** Followed after a number means "Amp." or Ampage in an expression relating to an electrical object. (e.g. 8A).
- AC** (Acronym) Alternating Current.
- Adj.** (Abbreviation) Adjustment(s).
- Assy.** (Abbreviation) Assembly.
- Au.** (Abbreviation) Audit(s).
- Bd.** (Abbreviation) Board.
- BOT** (Abbreviation) Bottom.
- Brkt.** (Abbreviation) Bracket.
- Bridge Rectifier** A configuration of a diode that allows current to flow in one direction producing both positive and negative pulsating DC Voltages.
- Color Coding** See Appendix H or I, Plastic Part Color Chart or Section 4, Chapter 1, Playfield - Plastic Posts & Spacers.
- Combination (Combo) [Shot]** Any variable pinball shot(s) made successively.
- Conn.** (Abbreviation) Connector.
- CMOS** Short for COSMOS (Complementary Symmetry M.O.S.); Complementary Metal-Oxide Semi-Conductor.
- CN** (Abbreviation) Connector (e.g. CN5-P3).
- CT** (Abbreviation) Center.
- DC** (Abbreviation) Direct Current.
- DT** (Abbreviation) Drop Target(s).
- DOTS** (Acronym) Diode On Terminal Strip.
- EB** (Abbreviation) Extra Ball.
- Eject** Playfield surface device to kick ball back into play; Saucer.
- EPROM** (Acronym) Erasable Programmable Read Only Memory. Can be erased using UV Light and re-programmed.
- e.g.** (Abbreviation) Latin- Exempli gratia. For Example.
- EOS** (Acronym) End-Of-Stroke (i.e. Switch for flipper).
- F** (Abbreviation) Fuse (i.e. F23).
- GA-Turn** Gauge & Turn describing the windings on a coil (e.g. 23-800, 23 is the gauge of wire and 800 is the amount of windings).
- G.I.** (Abbreviation) General Illumination (Lamps).
- HWH** (Abbreviation) Hex Washer Head.
- IC** (Acronym) Integrated Circuit (As in after 24-Pin IC).
- ID or I.D.** (Acronym) Inside Dimension.
- i.e.** (Abbreviation) Latin- Id est. That is.
- IO or I/O** (Abbreviation) Input / Output (e.g. I/O Power Driver Bd.)
- LT, Lt. or L.** (Abbreviation) Left.
- Laser Kick** A coil/plunger used above the playfield to kick pinball back into play.
- LED** (Acronym) Light Emitting Diode.
- Loop [Shot]** Continuously up a ramp and back to the flipper.
- Lwr.** (Abbreviation) Lower.
- Orbit [Shot]** From the left or right flipper around the back rail of the playfield back to the flipper.
- MB** (Abbreviation) Magnet Board.
- M-BALL or MBALL** (Abbreviation) Multiball™ More than 1 ball in game play.
- MID** (Abbreviation) Middle
- Non-Reflexive** See Reflexive.
- No. or N° or #** (Abbreviation) Number
- NPF** (Acronym) No Problem Found.
- N.C. or NC** (Abbreviation) Normally Closed.
- N.O. or NO** (Abbreviation) Normally Open.
- NS** (Abbreviation) Not Stuffed. (Use in Part Listings, Sec. 5)
- OD or O.D.** (Abbreviation) Outside Dimension.
- P** (Abbreviation) Pin (e.g. CN5-P3).
- PCB** (Acronym) Printed Circuit Board
- P/F** (Abbreviation) Playfield.
- PIA LED** (Acronym) Peripheral Interface Adapter Light Emitting Diode.. This is a diagnostic LED on the CPU; it should not be lit during normal operation of a pinball game.
- Plumb Bob Tilt** Weight on Tilt Assembly.
- PPH** (Abbreviation) Phillips Pan Head.
- Pop(s)** Another term for Turbo Bumper(s).
- PPB** (Acronym) Playfield Power Board ("Popcorn-Popping Bd.").
- PREV** (Abbreviation) Previous.
- PSB** (Abbreviation) Power Supply Board
- RAM** (Acronym) Random Access Memory. RAM can store input instructions and supply output information.
- Reflexive/Non-Reflexive Reflexive**—Solenoid Drive Transistor is enabled directly by a switch closure on the (Relating to CPU Boards) solenoid assembly (Ver. 1/2).
- Non-Reflexive**—Solenoid Drive Transistor is enabled by the CPU after reading a switch closure in the Switch Matrix (Ver. 3). Also note: All CPU Boards are backwards compatible (e.g. Jurassic Park/Ver. 3 to Time Machine/ Ver. 2). Swapping a Ver. 2 Board to a Ver. 3 is not possible due to the special solenoids section (i.e. Slingshots, Turbo Bumpers, etc.) changing from **REFLEXIVE** to **NON-REFLEXIVE** on Ver. 3 Boards.
- Relay** An automatic switch operated by current in a coil.
- ROM** (Acronym) Read Only Memory. ROM cannot store input instructions but can supply output information. ROM can be programmed only once.
- RMA** (Abbreviation) Return Merchandise Authorization Number
- RT, Rt. or R.** (Abbreviation) Right; ("R" at the end of Target Assy. Part N° signifies Target Insert is Reversed.)
- RO** (Abbreviation) Rollover (switches).
- Saucer** See Eject.
- Scoop** A hole into the playfield. A metal scoop is in place to guide the ball into the kick-back under the playfield.
- Slam Tilt** A switch which closes when the game is slammed into or the Coin Door is slammed shut. Depending on adjustable settings, will cancel game in play when the number of closures required is achieved.
- SMB** (Abbreviation) Shaker Motor Board.
- Solenoid** A coil used for Electro Magnetic devices such as relays, flippers, slingshots, etc.
- SSFB** (Abbreviation) Solid State Flipper Board.
- STEP** Refers to the service switches on the coin door.
- Sub-Assy.** (Abbreviation) Sub-Assembly.
- S-U or S/U** (Abbreviation) Stand-Up (targets).
- TM** (Abbreviation) Trademark
- Transfer [Shot]** Maneuvering the ball in play from one flipper to the other. With flipper in the up position and the ball cradled by that flipper one would activate the flipper button in a quick repetitive manner to bounce the ball to the other side. Skilled players can rebound the ball off the slingshot.
- Tri-Ball** Three balls in play.
- TTL** (Abbreviation) Transistor-Transistor Logic
- Upr.** (Abbreviation) Upper.
- V or v** (Abbreviation) Volt(s).
- Ver.** (Abbreviation) Version.
- VUK** (Acronym) Vertical Up-Kicker (Super or Standard).
- X** (Abbreviation) "Times" A multiplier; also used in dimensions.
- X-Ball** An undetermined number of ball(s) during game play.
- Zener Diode** A semi-conductor diode used for voltage regulation. Application depends on reverse break-down voltage.
- "-00B"** "B" at the end of Coil Part Numbers signifies that the diode is attached to the bottom of the lug.
- "-00T"** "T" at the end of Coil Part Numbers signifies that the diode is attached to the top of the lug (the side nearest the coil-winding).

STERN® PINBALL, INC. LIMITED WARRANTY

STERN® PINBALL, INC., ("SELLER") WARRANTS ONLY TO THE INITIAL PURCHASER OF ITS PRODUCTS THAT THE ITEMS LISTED BELOW ARE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP UNDER NORMAL USE AND SERVICE FOR THE WARRANTY PERIOD SPECIFIED:

PRINTED CIRCUIT BOARDS (GAME LOGIC):	2 MONTHS
DOT MATRIX DISPLAY BOARDS:	9 MONTHS

NO OTHER PARTS OF SELLER'S PRODUCT ARE WARRANTED.

WARRANTY PERIODS ARE EFFECTIVE FROM THE INITIAL DATE OF SHIPMENT FROM SELLER TO ITS AUTHORIZED DISTRIBUTORS.

SELLER'S SOLE LIABILITY SHALL BE, AT ITS OPTION, TO REPAIR OR REPLACE PRODUCTS WHICH ARE RETURNED TO SELLER DURING THE WARRANTY PERIODS SPECIFIED, PROVIDED:

1. SELLER IS NOTIFIED PROMPTLY UPON DISCOVERY BY PURCHASER THAT STATED PRODUCTS ARE DEFECTIVE.
2. SUCH PRODUCTS ARE PROPERLY PACKAGED AND THEN RETURNED FREIGHT PREPAID, TO SELLER'S PLANT.

THIS WARRANTY DOES NOT APPLY TO ANY PARTS DAMAGED DURING SHIPMENT AND/OR DUE TO IMPROPER HANDLING, OR DUE TO IMPROPER INSTALLATION OR USAGE, OR ALTERATION. IN NO EVENT SHALL THE SELLER BE LIABLE FOR ANY ANTICIPATED PROFITS, LOSS OF PROFITS, LOSS OF USE, ACCIDENTAL OR CONSEQUENTIAL DAMAGES OR ANY OTHER LOSSES INCURRED BY THE CUSTOMER IN CONNECTION WITH THE PURCHASE OF A STERN® PINBALL, INC. PRODUCT.

WARRANTY DISCLAIMER

EXCEPT AS SPECIFICALLY PROVIDED IN A WRITTEN CONTRACT BETWEEN SELLER AND PURCHASER, THERE ARE NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

CAUTIONS, WARNINGS & NOTICES

Caution

 FOR SAFETY AND RELIABILITY, SUBSTITUTE PARTS AND EQUIPMENT MODIFICATIONS ARE NOT RECOMMENDED (AND MAY VOID ANY WARRANTIES). USE OF NON-STERN® PINBALL INC. PARTS OR MODIFICATIONS OF GAME CIRCUITRY, MAY ADVERSELY AFFECT GAME PLAY, OR MAY CAUSE INJURIES. TRANSPORT PINBALL GAMES WITH HINGED BACKBOX IN THE DOWN POSITION ONLY! ALWAYS TAKE GREAT CARE WHEN SERVICING ANY GAME. ALWAYS READ THE SERVICE MANUAL BEFORE REPLACING OR SERVICING COMPONENTS. SUBSTITUTIONS OF PARTS OR EQUIPMENT MODIFICATIONS MAY VOID FCC TYPE ACCEPTANCE.

Always Disconnect The Line Voltage Before Servicing. Some Parts May Still Hold Current When Unplugged.

Warning

 THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY, AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTIONS MANUAL, MAY CAUSE INTERFERENCE TO RADIO COMMUNICATIONS. IT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A COMPUTING DEVICE PURSUANT TO SUBPART J OF PART 15 OF FCC RULES, WHICH ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST SUCH INTERFERENCE WHEN OPERATED IN A COMMERCIAL ENVIRONMENT. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE INTERFERENCE IN WHICH CASE THE USER AT HIS OWN EXPENSE WILL BE REQUIRED TO TAKE WHATEVER MEASURES MAY BE REQUIRED TO CORRECT THE INTERFERENCE.

RF INTERFERENCE NOTICE, CABLE HARNESS PLACEMENTS AND GROUND STRAP ROUTING ON THIS GAME HAVE BEEN DESIGNED TO KEEP RF RADIATION AND CONDUCTION WITHIN LEVELS ACCEPTED BY THE FCC RULES. TO MAINTAIN THESE LEVELS, REPOSITION HARNESSES AND RECONNECT GROUND STRAPS TO THEIR ORIGINAL PLACEMENTS, IF THEY BECOME DISCONNECTED DURING MAINTENANCE.

Notices

THIS DOCUMENT AND THE DATA DISCLOSED HEREIN OR HERewith IS NOT TO BE REPRODUCED (EXCEPT WHERE NOTED), USED OR OTHERWISE DISCLOSED IN WHOLE OR IN PART TO ANYONE WITHOUT WRITTEN CONSENT OF STERN® PINBALL, INC. WARNING: PRODUCTS IN THIS MANUAL, THE COMPANY NAME AND DEVICES AND THE DESIGN OF THE MANUAL ITSELF, ARE PROTECTED BY FEDERAL PATENTS (AND PATENTS PENDING), DESIGN REGISTRATIONS, TRADEMARKS AND COPYRIGHTS. ACTION WILL BE TAKEN IN THE EVENT OF INFRINGEMENT OR IMITATION. THE RIGHT IS RESERVED TO CHANGE SPECIFICATIONS WITHOUT PRIOR NOTICE.

▼ U.S. Customary Inch-Ruler

Metric Conversion

1/16"	0.0625"
1/8"	.125"
1/4"	.25"
1/2"	.5"
3/4"	.75"
1/32" (.03125")	

1" = 2.54cm / 25.4mm
1cm = .3937"
1mm = .03937"

For metric, multiply inch value by metric value, e.g. 5" X 2.54cm = 12.7cm or 127mm.
For US, multiply metric value by inch value, e.g. 13cm X .3937" = 5.1181"
