

Service Bulletin #32

To: Service Managers
From: Data East Pinball Service Department
Date: 17 Dec. 1991
Subject: Star Trek Ramp Up Mechanism

Symptom: The Up Down Ramp doesn't always come back down.

Solution: Check the Ramp Up switch to insure that it is closed when the ramp is up. If the switch is functioning properly check to make sure the coil bobbin screw on the latching mechanism is secured. A limited number of games did not have loctite applied and we suggest at your next maintenance service call you tighten and loctite the bobbin screw. See figure 1.
