RE: Modification to *BAYWATCH* Early Production Games

With the new introduction of **PORTALS™ SERVICE MENU** in Baywatch™ games, some early production games may experience the following symptom.

SYMPTOM — When entering the **Portals™ Service Menu**, the *Icons* may start to scroll immediately.

EXPLANATION — The **Green "SERVICE CREDITS/SELECT" Button** is more than likely, locked in the down position (it is still a "Toggle Up/Down" Button). By depressing this switch once, it will now pop up. The display should now be normal with one *Icon* only flashing.

MODIFICATION— To make sure this does not occur again, make the **Green "SERVICE CREDITS/SELECT" Button** a "Momentary" Button like the **Black "BEGIN TEST/ENTER" Button**.

Step 1
Open the Coin Door and locate the Service Switch Set Bracket & Coin Door Mounting Bracket. (See Fig. 1)

Step 2
Remove the 2 Phillips Screws securing the Switch Set Bracket to the Coin Door Bracket. (See Fig. 2)

Step 3
The Switch Bracket will now be separated from the Coin Door Bracket still attached by the wires. (See Fig. 3)

Step 4
Locate the Green Button Switch. Remove the silver "C" shape wire form from the switch. The switch is now a "non-interlocking" Momentary Switch. (See Fig. 3 & 4)

Step 5
Reverse procedure to reassemble.
